THE LYMPHATIC SYSTEM

The lymphatic system is a network of tissues and organs that help rid the body of toxins, waste and other unwanted materials. The tissues and organs in the lymphatic system create, store, and carry white blood cells called lymphocytes that fight disease.

CIRCULATORY SYSTEM

LYMPHATIC SYSTEM

Tonsils:

The tonsils are two small masses of lymph tissue that make lymphocytes.

Thymus:

Lymphocytes also grow and multiply in the thymus.

Spleen:

The spleen makes lymphocytes to fight infection and disease.

White blood cells travel throughout the body in lymph (fluid) and are transported by a network of thin tubes called lymph vessels.

Lymphatic capillary

Lymph Nodes:

Lymph nodes filter the lymph and store white blood cells to help fight disease.

Guide The Lymphatic System:

Lymphatic System (Speedy Study Guides) Speedy Publishing, 2014-06-21 The lymphatic system is one of the more complex systems of the body. It is responsible for keeping a person's fluids balanced and putting fluids into the blood. It is also responsible for making leukocytes and antibodies to help fight infection and disease. A chart of how the lymphatic system works would show you all the capillaries, vessels, and nodes that make up the system. Some charts will even show you in detail how things flow in and out of each node and filter out through the body.

Lymphatic System (Advanced) Speedy Study Guides Speedy Publishing, 2014-07-15 The Human Lymphatic System is essentially the body's drainage system. A network of small structures and vessels called lymph nodes collects fluid from around the human body and gets it back into the blood circulation. Any biology student would benefit greatly from a pamphlet that explains the basic functions of the human lymphatic system.

Lymphatic System Speedy Publishing, 2014-09-02 Whether you are a nursing student or pre-med, there are many things that you will need to know. All the information you are required to learn can seem utterly overwhelming. Anatomy and physiology of the body, systems pharmacology, and biochemistry are just some of the classes you will be required to take. These courses and managing time will all but consume you. In most cases, there is no getting around the need for memorization. When studying the lymphatic system and all its vessels and cellular functions, it would be essential to have a study guide for quick and easy reminders.
