Guide to Standard Floras of the World David G. Frodin, 2001-06-14 This 2001 book provides a selective annotated bibliography of the principal floras and related works of inventory for vascular plants The second edition was completely updated and expanded to take into account the substantial literature of the late

twentieth century and features a more fully developed review of the history of floristic documentation. The works covered are principally specialist publications such as floras, checklists, distribution atlases, systematic iconographies and enumerations or catalogues, although a relatively few more popularly oriented books are also included. The Guide is organised in ten geographical divisions with these successively divided into regions and units, each of which is prefaced with a historical review of floristic studies. In addition to the bibliography, the book includes general chapters on botanical bibliography, the history of floras and general principles and current trends, plus an appendix on bibliographic searching, a lexicon of serial abbreviations and author and geographical indexes.

Public Participation in the Governance of International Freshwater Resources Carl E. Bruch, 2005. Bruch, a senior attorney of the Environmental Law Institute, presents work from an April 2003 symposium co-sponsored by the Environmental Law Institute, the United Nations University and other institutions. Papers from the symposium identify innovative approaches in watershed management and look at political, linguistic, legal, cultural and geographical issues.

Climate Change and Rainfall Extremes in Africa Victor Ongoma, 2025-04-21. Climate Change and Rainfall Extremes in Africa: Occurrence, Impacts and Adaptation provides the latest developments on extreme rainfall in Africa along with an analysis of current impacts, future implications and community adaptations. The book's chapters are organized into three parts: 1. Understanding Rainfall Extremes, 2. Regional Rainfall and Hydrological Extremes, and 3. Prediction, Impacts and Adaptation to Rainfall Extremes. Specific sections examine rainfall variability in Africa and across the world, how climate change has contributed to the increasing severity of events, focus on different regions and various meteorological extremes including tropical cyclones, drought, flooding, rising water levels and changes in rainfall concentration. Final sections look ahead to the future of forecasting rainfall, economic implications, damage assessment, adaptation, community resilience and risk reduction measures. This timely resource will deepen readers' understanding of how climate change and extreme rainfall in Africa and elsewhere are impacting communities and what can be done to mitigate the effects. Provides a conceptual framework that gives readers an interdisciplinary understanding of climate change and rainfall extremes in Africa. Includes case studies that offer practical examples and real-world data. Presents end-of-chapter summaries that highlight findings and future implications.
