**Headless Males Make Great Lovers** Marty Crump, 2024-05-31 The natural world is filled with diverse not to mention quirky and odd animal behaviors Consider the male praying mantis that continues to mate after being beheaded the spiders insects and birds that offer gifts of food in return for sex the male hip pocket frog that carries his own tadpoles the baby spiders that dine on their mother the beetle that craves excrement or the starfish that sheds an arm or two to escape a predator's grasp Headless Males Make Great Lovers and Other Unusual Natural Histories celebrates the extraordinary world of animals with essays on curious creatures and their amazing behaviors In five thematic chapters Marty Crump a tropical field biologist well known for her work with the reproductive behavior of amphibians examines the bizarre conduct of animals as they mate parent feed defend themselves and communicate Crump's enthusiasm for the unusual behaviors she describes from sex change and free love in sponges to aphrodisiac concoctions in bats is visible on every page thanks to her skilled storytelling which makes even

sea slugs dung beetles ticks and tapeworms fascinating and appealing Steeped in biology Headless Males Make Great Lovers points out that diverse and unrelated animals often share seemingly bizarre behaviors evidence Crump argues that these natural histories though outwardly weird are successful ways of living Illustrated throughout and filled with vignettes of personal and scientific interest Headless Males Make Great Lovers will enchant the general reader with its tales of blood squirting horned lizards and intestine ejecting sea cucumbers all in the service of a greater appreciation of the diversity of the natural histories of animals

**Travel, Discovery, Transformation** Gabriel R. Ricci, 2017-09-29 This latest volume in the Culture Civilization series gathers interdisciplinary voices to present a collection of essays on travel and travel narratives The essays span a range of topics from iconic ancient travel stories to modern tourism They discuss travel in the ancient world modern heroic travels the literary culture of missionary travel the intersection of fiction and travel narratives modern literary traditions and visions of Greece personal identity and expatriation Essays also address travel memoirs the reimagining of worlds through travel transformed landscapes and animals in travel narratives diplomacy English women travel writers and pilgrimage and health in the medieval world The history of travel writing takes in multiple pursuits exploration and conquest religious pilgrimage and missionary work educational tourism and diplomacy scientific and personal discovery and natural history and oral history As a literary genre it has enhanced a wide range of disciplines including geography ethnography anthropology and linguistics Moreover twenty first century interests in travel and travel writing have produced a global framework that promises to expand travel's theoretical reach into the depths of the Internet thus challenging our conventional concept of what it means to travel The fact that travel and travel writing have a prehistory that is embedded in foundational religious texts and ancient narratives of journey like the Odyssey and the Epic of Gilgamesh makes both travel and travel writing fundamental and essential expressions of humanity Travel encourages writing particularly as epistolary and poetic chronicling This is clearly a history and tradition that began with human communication and which has kept pace with our collective development

global perspective to this essential text      **General Technical Report RMRS** ,1998      **Wildlife Falsehoods** A. L. (Tony) Gennaro,2006 A Midwestern biologist presents 52 wonderful stories about wildlife myths such as A camel s humps do not store water an elk is really a red deer elephant graveyards do exist and flashing insects are beetles not fireflies      *Wildlife and Invertebrate Response to Fuel Reduction Treatments in Dry Coniferous Forests of the Western United States* David S. Pilliod,2006 This paper synthesizes available information on the effects of hazardous fuel reduction treatments on terrestrial wildlife and invertebrates in dry coniferous forest types in the West We focused on thinning and or prescribed fire studies in ponderosa pine *Pinus ponderosa* and dry type Douglas fir *Pseudotsuga menziesii* lodgepole pine *Pinus contorta* and mixed coniferous forests Overall there are tremendous gaps in information needed to evaluate the effects of fuel reduction on the majority of species found in our focal area Differences among studies in location fuel treatment type and size and pre and post treatment habitat conditions resulted in variability in species responses In other words a species may respond positively to fuel reduction in one situation and negatively in another Despite these issues a few patterns did emerge from this synthesis In general fire dependent species species preferring open habitats and species that are associated with early successional vegetation or that consume seeds and fruit appear to benefit from fuel reduction activities In contrast species that prefer closed canopy forests or dense understory and species that are closely associated with those habitat elements that may be removed or consumed by fuel reductions will likely be negatively affected by fuel reductions Some habitat loss may persist for only a few months or a few years such as understory vegetation and litter that recover quickly The loss of large diameter snags and down wood which are important habitat elements for many wildlife and invertebrate species may take decades to recover and thus represent some of the most important habitat elements to conserve during fuel reduction treatments Management activities that consider the retention of habitat structures such as snags down wood and refugia of untreated stands may increase habitat heterogeneity and may benefit the greatest number of species in the long run

**Vertebrate Skeletal Histology and Paleohistology** Vivian de Buffrénil,Armand J. de Ricqlès,Louise Zylberberg,Kevin Padian,2021-06-24 Vertebrate Skeletal Histology and Paleohistology summarizes decades of research into the biology and biological meaning of hard tissues in both living and extinct vertebrates In addition to outlining anatomical diversity it provides fundamental phylogenetic and evolutionary contexts for interpretation An international team of leading authorities review the impact of ontogeny mechanics and environment in relation to bone and dental tissues Synthesizing current advances in the biological problems of growth metabolism evolution ecology and behavior this comprehensive and authoritative volume is built upon a foundation of concepts and technology generated over the past fifty years      *Reptiles and Amphibians* John P. Rafferty Associate Editor, Earth Sciences,2011-01-15 This volume details the physical characteristics as well as the breeding and feeding behaviors of both reptiles and amphibians with a look at many of these remarkable creatures      **The Amphibians and Reptiles of Michigan** J. Alan Holman,2012 With its temperate climate and variety of

habitats Michigan supports a diverse array of animals and plants including fifty four species of amphibians and reptiles The dispersal and biology of the Michigan herpetofauna amphibians and reptiles is even more unique because Michigan consists of two peninsulas that project into large freshwater seas and also because it was completely covered by a massive ice sheet a relatively short time ago In *The Amphibians and Reptiles of Michigan A Quaternary and Recent Faunal Adventure* author J Alan Holman explores the state s amphibians and reptiles in detail and with many helpful illustrations making this the only volume of its kind available Holman uniquely bridges the gap between neo and paleoherpetology and shows that Michigan s modern herpetofaunas reflect Pleistocene ice age and Holocene warm period after the ice age events as the entire modern population was forced to re invade the state after the last withdrawal of ice In Part 1 Holman discusses Michigan as an amphibian and reptile habitat including a geological climatic and vegetational history Part 2 presents recent species accounts covering all fifty four species of amphibians and reptiles along with their general distribution Michigan distribution with range maps geographic variation habitat and habits reproduction and growth diet predation and defense interaction with humans behavioral characteristics population health and general remarks In Part 3 Holman examines the Michigan herpetofauna in Quaternary and recent historical times and the species accounts include Pleistocene Holocene and archaeological records Color photographs of major herpetological habitats in Michigan are provided and color photographs of all modern species are included Black and white illustrations depict both modern and ancient speices Herpetologists paleontologists zoologists ecologists and general biologists as well as anyone who loves salamanders frogs turtles and snakes will appreciate the comprehensive research presented in *The Amphibians and Reptiles of Michigan*

*Histones and Other Basic Nuclear Proteins* Gary S. Stein, Janet L. Stein, 2024-12-20 This comprehensive book is a compilation of Professor Lubomir S Hnilica s twenty years of research experimentally addressing the chemistry and the biological functions of chromosomal proteins The histones and other nuclear proteins found associated with DNA in a number of tissues and cell types are featured Lubomir Hnilica played a major role in establishing the extent to which these basic chromosomal polypeptides are conserved and the manner in which they interact with DNA to modify chromatin structure In addition non histone chromosomal protein research is explained and his technique of applying several biochemical and immunological approaches to the characterization of this complex and heterogeneous class of chromosomal polypeptides is discussed Highlighted is the use of chemical crosslinking for studying protein DNA interactions in intact cells The proteins as well as the structure organization and regulation of the genes are also presented
