Het Nederlandse Landschap Een Historischgeografische Benadering:

Het Nederlandse landschap, 1991 **The Netherlands and the Dutch** Eduardo F. J. De Mulder, Ben C. De Pater, Joos C. Droogleevers Fortuijn, 2018-07-28 This book presents a geographical survey of the Netherlands reviewing recent and historic developments that made the nation. It is a relatively wealthy country and the Dutch belong to the happiest and healthiest on earth. But these qualities are not evenly spread over the country. The urban agglomeration of Randstad Holland in the west hosts most of the nation's capital and young well-educated people, whereas older and less educated people are concentrated in the peripheral areas in the north-east and south. Interactions between physical and human geographical aspects of the Netherlands are described quite extensively. Its position on one of Europe's most prominent deltas, its abundance of energy resources and the course of history have all contributed to its present national position and international networks. But early and recent Dutch have also shaped this country. They reclaimed lakes and shallow seas, protected the lowlands against floods, re-allotted land parcels and designed and developed urban areas. Besides its focus on water-related topics, the book also covers social and cultural aspects. The book also discusses future challenges and offers scenarios for solutions. This is a book for those interested in a wide variety of recent aspects of the geography of the Netherlands described in a historical context. It appeals to students and researchers of many disciplines in geography, urban and landscape planning, water management, history and cultural studies.

The Ashgate Research Companion to Dutch Art of the Seventeenth Century Wayne Franits, 2017-07-05 Despite the tremendous number of studies produced annually in the field of Dutch art over the last 30 years or so and the strong contemporary market for works by Dutch masters of the period as well as the public's ongoing fascination with some of its most beloved painters, until now there has been no comprehensive study assessing the state of research in the field. As the first study of its kind, this book is a useful resource for scholars and advanced students of seventeenth-century Dutch art and also serves as a springboard for further research. Its 19 chapters, divided into three sections and written by a team of internationally renowned art historians, address a wide variety of topics ranging from those that might be considered traditional to others that have only drawn scholarly attention comparatively recently.

European Rural Landscapes Hannes Palang, 2004-05-31 This book, a compendium of 28 papers selected from two recent conferences on the topic, focuses on aspects of rural landscape broadly related to issues of language, representation and power. These are issues that have not been addressed on a pan-European landscape level before. The aim is to offer a deeper interdisciplinary understanding of historical and contemporary processes in European landscapes.

Op zoek naar de geschiedenis van het landschap Hans Renes, 2010 Oorspronkelijke natuur is in ons land zeer schaars Eigenlijk bestaat heel Nederland uit cultuurlandschap landschap dat door de mens grondig is aangepast aan de eigen behoeften Daar zijn eeuwen overheen gegaan en in ons huidige landschap zijn sporen uit verschillende tijden bewaard gebleven Soms zijn die eenvoudig te herkennen door een goede waarnemer zoals hooggelegen oude dorpskernen in het vlakke westen een wiel naast een dijk een terp uitgestrekte heidevelden in Oost Nederland een jaagpad een tiendweg een oude es een motte Veel andere sporen zijn bijna onzichtbaar en vragen een geoefend oog Deel 6 in de Zoekreeks geeft een beschrijving van de verschillende cultuurlandschappen en van hun voorgeschiedenis Uitgebreid komt aan de orde welke bronnen en methodes er zijn om zelf op zoek te gaan naar de achtergronden van het historische landschap *Five centuries of farming* Jan Bieleman, 2023-09-04 Where the lower reaches of the rivers Rijn Maas and Schelde have passed through the Northwest European plain to finally flow out into the North Sea a unique country of towns had come about during the Late Middle Ages Since then due to its natural and central location this country the Netherlands has turned into a true crossroads of European trade connections between east and west north and south A highly urbanised country emerged and as the urban economies prospered they have had a great impact on the surrounding countryside This in turn has affected the rural communities and has stimulated all kinds of agrarian activities Highly productive agribusiness complexes have been the result Today experts rank Dutch agriculture and horticulture as one of the most productive in the world Milk production per cow and arable farming and horticulture productivity per man hour is amongst the highest known This book is meant to give an overview of the historical processes of five centuries of farming and it makes clear that the old farming society was only seemingly static This account of Dutch agricultural history demonstrates how Dutch farmers and horticulturist have always been keen on resetting their aims when the ever changing economic environment induced them to do so **Routledge**

Handbook of Landscape Character Assessment Graham Fairclough, Ingrid Sarlöv Herlin, Carys Swanwick, 2018-05-11 In this multi authored book senior practitioners and researchers offer an international overview of landscape character approaches for those working in research policy and practice relating to landscape Over the last three decades European practice in landscape has moved from a narrow if relatively straightforward focus on natural beauty or scenery to a much broader concept of landscape character constructed through human perception and transcending any of its individual elements Methods tools and techniques have been developed to give practical meaning to this idea of landscape character The two main methods Landscape Character Assessment LCA and Historic Landscape Characterisation HLC were applied first in the United Kingdom but other methods are in use elsewhere in Europe and beyond to achieve similar ends This book explores why different approaches exist the extent to which disciplinary or cultural specificities in different countries affect approaches to land management and landscape planning and highlights areas for reciprocal learning and knowledge transfer

Contributors to the book focus on examples of European countries such as Sweden Turkey and Portugal that have adopted and extended UK style landscape characterisation but also on countries with their own distinctive approaches that have developed from different conceptual roots as in Germany France and the Netherlands The collection is completed by chapters looking at landscape approaches based on non European concepts of landscape in North America Australia and New Zealand This book has an introductory price of 125 205 which will last until 3 months after publication after this time it will revert to 140 225

Coping with Crisis: The Resilience and Vulnerability of Pre-Industrial Settlements Daniel R. Curtis, 2016-05-13 Why in the pre industrial period were some settlements resilient and stable over the long term while other settlements were vulnerable to crisis Indeed what made certain human habitations more prone to decline or even total

collapse than others All pre industrial societies had to face certain challenges exogenous environmental hazards such as earthquakes or plagues economic or political hazards from outside such as warfare or expropriation of property or hazards of their own making such as soil erosion or subsistence crises How then can we explain why some societies were able to overcome or negate these problems while other societies proved susceptible to failure as settlements contracted stagnated were abandoned or even disappeared entirely This book has been stimulated by the questions and hypotheses put forward by a recent disaster studies literature in particular by placing the intrinsic arrangement of societies at the forefront of the explanatory framework Essentially it is suggested that the resilience or vulnerability of habitation has less to do with exogenous crises themselves but on endogenous societal responses which dictate a the extent of destruction caused by crises and the capacity for society to protect itself and b the capacity to create a sufficient recovery By empirically testing the explanatory framework on a number of societies between the Middle Ages and the nineteenth century in England the Low Countries and Italy it is ultimately argued in this book that rather than the protective functions of the state or the market or the implementation of technological innovation or capital investment the most resilient human habitations in the pre industrial period were those that displayed an equitable distribution of property and a well balanced distribution of power between social interest groups Equitable distributions of power and property were the underlying conditions in pre industrial societies that all
