¹² To address the issue, we estimated the model for each country separately. The results are available from the author upon request.

As noted earlier, the 1990s witnessed a dramatic rise in the number of people who were employed in the service sector. This was particularly true in the United States, where the service sector grew from 55% of the economy in 1970 to 75% in 1990. This growth was driven by a number of factors, including the increasing demand for services, the growth of the service sector, and the increasing demand for services.
