of Clearview AI helmed by Hoan Ton That an Australian computer engineer and Richard Schwartz a former Rudy Giuliani advisor and its astounding collection of billions of faces from the internet The company was boosted by a cast of controversial characters including conservative provocateur Charles C Johnson and billionaire Donald Trump backer Peter Thiel who all seemed eager to release this society altering technology on the public Google and Facebook decided that a tool to identify strangers was too radical to release but Clearview forged ahead sharing the app with private investors pitching it to businesses and offering it to thousands of law enforcement agencies around the world Facial recognition technology has been quietly growing more powerful for decades This technology has already been used in wrongful arrests in the United States Unregulated it could expand the reach of policing as it has in China and Russia to a terrifying dystopian level Your Face Belongs to Us is a gripping true story about the rise of a technological superpower and an urgent warning that in the absence of vigilance and government regulation Clearview AI is one of many new technologies that challenge what Supreme Court Justice Louis Brandeis once called the right to be let alone Democratic Policing in Transitional and Developing Countries

Michael D. Wiatrowski, 2016-05-13 Is it possible to create democratic forms of policing in transitional and developing societies This volume argues that policing models and practices promoted by the west are often inadequate for adoption by countries making democratic transitions because they do not adequately address issues such as human rights equity co production accountability openness and organizational change Therefore police reform is often limited to a one size fits all approach The book expands the dialogue so that discussions of democratic policing around the world are more realistic comprehensive and sensitive to the local context Detailed case studies on Iraq South Africa Northern Ireland and Kazakhstan provide a realistic assessment of the current state of policing The editors use the studies to suggest how to promote democratic policing and other important goals of democratic reform around the world The volume will assist academics policy makers NGOs and others in tailoring a local democratic policing strategy within a broader framework to enhance socioeconomic development and citizen capacity build social capital reduce various forms of conflict and support human rights Demons of Democracy Mark Davis, 2011-02-28 Demons of Democracy describes the Constitutional Dementia that has pervaded the highest levels of government It explains why the Constitution is being used as a doormat instead of a road map Demons notes how a litigious army of a million strong has exploited the citizenry which empowers them It covers why America is at war with its own identity and the freedoms we once thought were absolute may not be so free anymore
