## **Library Of Topologies Power Beyond Territory Networks:**

**Topologies of Power** John Allen, 2016-01-13 *Topologies of Power* amounts to a radical departure in the way that power and space have been understood. It calls into question the very idea that power is simply extended across a given territory or network and argues that power today has a new found reach. Topological shifts have subtly altered the reach of power enabling governments, corporations and NGOs alike to register their presence through quieter, less brash forms of power than domination or overt control. In a world in which proximity and distance increasingly play across one another, topology offers an insight into how power remains continuous under transformation, the same but different in its ability to shape peoples lives. Drawing upon a range of political, economic and cultural illustrations, the book sets out a clear and accessible account of the topological workings of power in the contemporary moment. It will be invaluable for both students and academics in human geography, politics, sociology and cultural studies.

**Frontier Tibet** Stéphane Gros, 2025-10-01 *Frontier Tibet: Patterns of Change in the Sino-Tibetan Borderlands* addresses a historical sequence that sealed the future of the Sino-Tibetan borderlands. It considers how, starting in the late nineteenth century, imperial formations and emerging nation states developed competing schemes of integration and debated about where the border between China and Tibet should be. It also ponders the ways in which this border is internalised today, creating within the People's Republic of China a space that retains some characteristics of a historical frontier. The region of eastern Tibet called Kham, the focus of this volume, is a productive lens through which processes of place making and frontier dynamics can be analysed. Using historical records and ethnography, the authors challenge purely externalist approaches to convey a sense of Kham's own centrality and the agency of the actors involved. They contribute to a history from below that is relevant to the history of China and Tibet and of comparative value for borderland studies.

**Young People in the Global South** Kate Pincock, Nicola Jones, Lorraine van Blerk, Nyaradzayi Gumbonzvanda, 2024-01-24 *Young People in the Global South: Voice, Agency and Citizenship* explores the spatial, relational, affective and material dimensions of adolescents and young people's civic engagement and political participation in lower and middle income contexts. This textbook questions how the everyday politics of exercising voice and agency is experienced at different scales, from the interpersonal to the global. It explores how structural inequalities and marginalisation, as well as social norms and attitudes, shape how voice, agency and participation are expressed by diverse young people in particular contexts with unique histories. Contributing authors focus on the experiences of young people who are marginalised based on age, gender, sexuality, disability, citizenship status and geographical location. Together they show how ageing through adolescence enables or constrains agency and voice. Textbook features include case studies on Africa, Asia, the Middle East and Latin America, as well as reflective accounts authored by adolescents and young people themselves and discussion questions. Filling a key gap in the knowledge about the concerns and experiences of young people in contexts beyond the Global North, this textbook will be of interest to academics, students and practitioners in the fields of childhood.
