El ecosistema del libro electrónico

universitario CORDÓN GARCÍA, José Antonio, GÓMEZ DÍAZ, Raquel, ALONSO ARÉVALO, Julio, ALONSO BERROCAL, José Luis, 2014-05-20 Se trata de un estudio que cuenta con tres partes claramente diferenciadas. Una primera parte en la que se ha desarrollado un investigación sobre la edición electrónica universitaria en el ámbito internacional con objeto de conocer las principales tendencias y experiencias que se están desarrollando en los diferentes países del mundo así como las implicaciones futuras que las mismas pueden tener en la producción, distribución y recepción de las obras académicas universitarias. Una segunda parte con un estudio de campo en el que se han abordado varios aspectos que el grupo entiende que están directamente implicados en la edición universitaria. En primer lugar un análisis de las características de la información disponible en sus páginas web desde la más formal como puede ser la existencia de referencias a los servicios desde las páginas principales de la universidad o de un directorio de personal en las páginas específicas de los servicios a los más estructurales como los sistemas de biblioteca electrónica o las características de la difusión. En segundo lugar se ha efectuado un análisis de la presencia de los servicios de bibliotecas universitarias en las redes sociales Twitter y Facebook habida cuenta de la importancia cada vez mayor que estos cobran para una adecuada visibilidad de los mismos. Y en tercer lugar se ha desarrollado una investigación sobre la presencia de las obras universitarias en las bibliografías recomendadas de los profesores y sobre las características de los servicios de bibliografías recomendadas que también cuentan cada vez con mayor incidencia en las opciones de consulta y compra de materiales por parte de los universitarios. *Fisioterapia*
