**Religion and Cultural Memory** Jan Assmann, Rodney Livingstone, 2006 In ten brilliant essays Jan Assmann explores the connections between religion culture and memory Building on Maurice

Halbwachs's idea that memory like language is a social phenomenon as well as an individual one he argues that memory has a cultural dimension too. He develops a persuasive view of the life of the past in such surface phenomena as codes, religious rites and festivals and canonical texts on the one hand and in the Freudian psychodrama of repressing and resurrecting the past on the other. Whereas the current fad for oral history inevitably focuses on the actual memories of the last century or so, Assmann presents a commanding view of culture extending over five thousand years. He focuses on cultural memory from the Egyptians, Babylonians and the Osage Indians down to recent controversies about memorializing the Holocaust in Germany and the role of memory in the current disputes between Israelis and Palestinians in the Middle East and between Protestants and Catholics in Northern Ireland.

It then shows the culmination of these literary genres within the single period known as the New Kingdom 1550-1080 B.C. and ends in the last millennium of Pharaonic civilization from the tenth century B.C. to the beginning of the Christian era. An introduction written in three parts by Antonio Loprieno, Hans W. Fischer, Elfert and Joseph G. Manning completes this classic anthology.

*The Egyptians* Sergio Donadoni, 1997-06-23 *The Egyptians* is a vibrant, accessible introduction to the people who lived along the Nile for almost thirty-five centuries. In this collection of essays, eleven internationally renowned Egyptologists present studies of ancient Egyptians arranged by social type: slaves, craftsmen, priests, bureaucrats, the pharaoh, peasants and women among others. These individual essays are filled with a wealth of historical detail that both informs and fascinates; we learn, for example, that Egyptian peasants could not afford burial; their corpses were abandoned on the desert fringe and that it was the bureaucrats who made the Egyptian system tick; the pyramids could not have been built without them. Read consecutively, the portraits merge to create a larger picture of Egyptian culture, state and society. The framework of the Egyptian state in particular is

touched upon in each essay describing the meticulous administration and well organized hierarchical system that fostered centuries of stability and prosperity

The Village in Antiquity and the Rise of Early Christianity Alan Cadwallader,James R. Harrison,Angela Standhartinger,L.

L. Welborn, 2023-12-28 A complete geographical and thematic overview of the village in antiquity and its role in the rise of Christianity. The volume begins with a state of question introduction by Thomas Robinson assessing the interrelation of the village and city with the rise of early Christianity. Alan Cadwallader then articulates a methodology for future New Testament studies on this topic, employing a series of case studies to illustrate the methodological issues raised. From there, contributors explore three areas of village life in different geographical areas by means of a series of studies written by experts in each discipline. They discuss the ancient near east, Egypt and Israel mainland, and Isthmian Greece, Asia Minor, and the Italian Peninsula. This geographic focus sheds light upon the villages associated with the biblical cities Israel, Corinth, Galatia, Ephesus, Philippi, Thessalonica, Rome, including potential insights into the rural nature of the churches located there. A final section of thematic studies explores central issues of local village life: indigenous and imperial cults, funerary culture, and agricultural and economic life.
