Life Exposed Biological Citizens After Chernobyl:

Life Exposed Adriana Petryna, 2011-09-19 On April 26 1986 Unit Four of the Chernobyl nuclear reactor exploded in then Soviet Ukraine More than 3 5 million people in Ukraine alone not to mention many citizens of surrounding countries are still suffering the effects Life Exposed is the first book to comprehensively examine the vexed political scientific and social circumstances that followed the disaster Tracing the story from an initial lack of disclosure to post Soviet democratizing attempts to compensate sufferers Adriana Petryna uses anthropological tools to take us into a world whose social realities are far more immediate and stark than those described by policymakers and scientists She asks What happens to politics when state officials fail to inform their fellow citizens of real threats to life What are the moral and political consequences of remedies available in the wake of technological disasters Through extensive research in state institutions clinics laboratories and with affected families and workers of the so called Zone Petryna illustrates how the event and its aftermath have not only shaped the course of an independent nation but have made health a negotiated realm of entitlement She tracks the emergence of a biological citizenship in which assaults on health become the coinage through which sufferers stake claims for biomedical resources social equity and human rights Life Exposed provides an anthropological framework for understanding the politics of emergent democracies the nature of citizenship claims and everyday forms of survival as they are interwoven with the profound changes that accompanied the collapse of the Soviet Union

Citizens of Worlds Jennifer Gabrys, 2022-11-15 An unparalleled how to guide to citizen sensing practices that monitor air pollution Modern environments are awash with pollutants churning through the air from toxic gases and intensifying carbon to carcinogenic particles and novel viruses The effects on our bodies and our planet are perilous Citizens of Worlds is the first thorough study of the increasingly widespread use of digital technologies to monitor and respond to air pollution It presents practice based research on working with communities and making sensor toolkits to detect pollution while examining the political subjects relations and worlds these technologies generate Drawing on data from the Citizen Sense research group which worked with communities in the United States and the United Kingdom to develop digital sensor toolkits Jennifer Gabrys argues that citizen oriented technologies promise positive change but then collide with entrenched and inequitable power structures She asks Who or what constitutes a citizen in citizen sensing How do digital sensing technologies enable or constrain environmental citizenship Spanning three project areas this study describes collaborations to monitor air pollution from fracking infrastructure to document emissions in urban environments and to create air quality gardens As these projects show how people respond to care for and struggle to transform environmental conditions informs the political subjects and collectives they become as they strive for more breathable worlds

Living in a Nuclear World Bernadette Bensaude-Vincent, Soraya Boudia, Kyoko Sato, 2022-03-10 The Fukushima disaster invites us to look back and probe how nuclear technology has shaped the world we live in and how we have come to live with it Since the first nuclear detonation

^AOxford Handbook of Expertise and Democratic Politics, 2023-05-05 In *The Oxford Handbook of Expertise and Democratic Politics* Gil Eyal and Thomas Medvetz have brought together a broad group of scholars who have engaged substantively and theoretically with debates regarding the nature of expertise and the social roles of experts to examine these areas within sociology and allied disciplines The analyses take an historical and relational approach to the topic and are motivated by the sense that growing mistrust in experts represents a danger to democratic politics today Bringing together investigations from social scientists philosophers and legal scholars into the political dimensions of expertise this Handbook connects interdisciplinary work done in science and technology studies with the more classic concerns topics and concepts of sociologists of professions and intellectuals

Revolution and War in Contemporary Ukraine Olga Bertelsen, 2016-10-01 What are the reasons behind and trajectories of the rapid cultural changes in Ukraine since 2013 This volume highlights the role of the Revolution of Dignity and the Russian Ukrainian war in the formation of Ukrainian civil society the forms of warfare waged by Moscow against Kyiv including information and religious wars Ukrainian and Russian identities and cultural realignment sources of destabilization in Ukraine and beyond memory politics and Russian foreign policies the Kremlin's geopolitical goals in its near abroad and factors determining Ukraine's future and survival in a state of war The studies included in this collection illuminate the growing gap between the political and social systems of Ukraine and Russia The anthology illustrates how the Ukrainian revolution of 2013-2014 Russia's annexation of the Crimean peninsula and its

invasion of eastern Ukraine have altered the post Cold War political landscape and with it the regional and global power and security dynamics

World at Risk Ulrich Beck, 2009 This is a collection of key essays by Beck analyzing the structural dynamics of the modern world the global nature of risk and the future of global policies

Semi-Citizenship in Democratic Politics Elizabeth F. Cohen, 2009-10-26 In every democratic polity there exist individuals and groups who hold some but not all of the essential elements of citizenship Scholars who study citizenship routinely grasp for shared concepts and language that identify forms of membership held by migrants children the disabled and other groups of individuals who for various reasons are neither full citizens nor non citizens This book introduces the concept of semi citizenship as a means to dramatically advance debates about individuals who hold some but not all elements of full democratic citizenship By analytically classifying the rights of citizenship and their various combinations scholars can typologize semi citizens and produce comparisons of different kinds of semi citizenships and of semi citizenships in different states The book uses theoretical analysis historical examples and contemporary cases of semi citizenship to illustrate how normative and governmental doctrines of citizenship converge and conflict making semi citizenship an enduring and inevitable part of democratic politics

Weathering Christoph F. E. Biopolitics, Governmentality and Humanitarianism Volha Piotukh, 2015-04-10 This book critically analyses the changing role and nature of post Cold War humanitarianism using Foucault's theories of biopolitics and governmentality It offers a compelling and insightful interpretation of the policies and practices associated with new humanitarianism in general as well as of the dynamics of two specific international assistance efforts the post 2001 conflict related assistance effort in Afghanistan and the post 2000 Chernobyl related assistance effort in Belarus The central argument of the book is that new humanitarianism represents a dominant regime of humanitarian governing informed by globalising neoliberalism and is reliant on a complex set of biopolitical disciplinary and sovereign technologies It demonstrates that while the purposes of humanitarian governing are specific to particular contexts its promise of care is more often than not accompanied by sovereign and or biopolitical violences Making an important contribution to existing scholarship on humanitarian emergencies and humanitarian action on biopolitics and governmentality this book will be of much interest to students and scholars of humanitarianism critical security studies governmentality and International Relations generally

Chernobyl Serhii Plokhy, 2018-05-15 A Chernobyl survivor and the New York Times bestselling author of *The Gates of Europe* mercilessly chronicles the absurdities of the Soviet system in this

vividly empathetic account of the worst nuclear accident in history Wall Street Journal On the morning of April 26 1986 Europe witnessed the worst nuclear disaster in history the explosion of a reactor at the Chernobyl Nuclear Power Plant in Soviet Ukraine Dozens died of radiation poisoning fallout contaminated half the continent and thousands fell ill In Chernobyl Serhii Plokhy draws on new sources to tell the dramatic stories of the firefighters scientists and soldiers who heroically extinguished the nuclear inferno He lays bare the flaws of the Soviet nuclear industry tracing the disaster to the authoritarian character of the Communist party rule the regime's control over scientific information and its emphasis on economic development over all else Today the risk of another Chernobyl looms in the mismanagement of nuclear power in the developing world A moving and definitive account Chernobyl is also an urgent call to action [Enlightenment Biopolitics](#) William Max Nelson, 2024-05-06 A wide ranging history tracing the birth of biopolitics in Enlightenment thought and its aftermath In Enlightenment Biopolitics historian William Max Nelson pursues the ambitious task of tracing the context in which biopolitical thought emerged and circulated He locates that context in the Enlightenment when emancipatory ideals sat alongside the horrors of colonialism slavery and race based discrimination In fact these did not just coexist Nelson argues they were actually mutually constitutive of Enlightenment ideals In this book Nelson focuses on Enlightenment era visions of eugenics including proposals to establish programs of selective breeding forms of penal slavery and spurious biological arguments about the supposed inferiority of particular groups The Enlightenment he shows was rife with efforts to shape harness and organize the minds and especially the bodies of subjects and citizens In his reading of the birth of biopolitics and its transformations Nelson examines the shocking conceptual and practical connections between inclusion and exclusion equality and inequality rights and race and the supposed improvement of the human species and practices of dehumanization

Inevitably Toxic Brinda Sarathy, Janet Brodie, Vivien Hamilton, 2018-10-30 Not a day goes by that humans aren t exposed to toxins in our environment be it at home in the car or workplace But what about those toxic places and items that aren t marked Why are we warned about some toxic spaces substances and not others The essays in **Inevitably Toxic** consider the exposure of bodies in the United States Canada and Japan to radiation industrial waste and pesticides Research shows that appeals to uncertainty have led to social inaction even when evidence e g the link between carbon emissions and global warming stares us in the face In some cases influential scientists engineers and doctors have deliberately manufactured doubt and uncertainty but as the essays in this collection show there is often no deliberate

deception We tend to think that if we can't see contamination and experts deem it safe then we are okay Yet having knowledge about the uncertainty behind expert claims can awaken us from a false sense of security and alert us to decisions and practices that may in fact cause harm In the epilogue Hamilton and Sarathy interview Peter Galison a prominent historian of science whose recent work explores the complex challenge of long term nuclear waste storage
