Lawrence Abel, 2015-01-16 This intriguing book examines Lincoln's assassination from a behavioral and medical sciences perspective, providing new insights into everything from ballistics and forensics to the medical intervention to save his life, the autopsy results, his compromised embalming, and the final odyssey of his body. In this book, E. Lawrence Abel sheds much needed light on the fascinating details surrounding the death of Abraham Lincoln, including John Wilkes Booth's illness that turned him into an assassin, the medical treatment the president is alleged to have received after he was shot, and the significance of his funeral for the American public. The author provides an in-depth analysis of the science behind the assassination, a discussion of the medical care Lincoln received at the time he was shot, and the treatment he would have received if he were shot today, and the impact of his death on his contemporaries and the American public. The book examines Lincoln's fatalism and his unbridled ambition in terms of empirical psychological science rather than the fanciful psychoanalytical explanations that often characterize Lincoln psychohistories. The medical chapters challenge the long-standing description of Lincoln's last hours and examine the debate about whether Lincoln's doctors inadvertently doomed him.      **A Biographical Dictionary of Silent Film Western Actors and Actresses** George A.
