Domains of Truth Lambert Zuidervart, 2023-03-10 Truth is in trouble In response this book presents a new conception of truth It recognizes that prominent philosophers have questioned whether the idea of truth is important Some have asked why we even need it Their questions reinforce broader trends in Western society where many wonder whether or why we should pursue truth Indeed some pundits say we have become a post truth society Yet there are good reasons not to embrace the cultural Zeitgeist or go with the philosophical flow reasons to regard truth as a substantive and socially significant idea This book explains why First it argues that propositional truth is only one kind of truth an important kind but not all important Then it shows how propositional truth belongs to the more comprehensive process of truth as a whole This process is a dynamic correlation between human fidelity to societal principles and a life giving disclosure of society The correlation comes to expression in distinct social domains of truth where either propositional or nonpropositional truth is primary The final
