

LIFE IN A GEOMETRICAL TOWN

Materials Needed:

One 12" x 18" sheet of paper, ruler, protractor, compass, straightedge, colored pencils, scissors, glue, 12x18" paper, construction paper

Before Class Begins:

1. Carefully read the directions through before beginning. To gain an understanding of what you are going to do.
2. Before creating your final project, create a rough draft of your map on scratch paper. Use the rough draft to adjust and where things will go on the larger map (12" x 18" paper). Then use your rough draft as a guide to help you create your map. "Your rough draft doesn't do harm to us."
3. There are 10 neighborhoods. Each is worth 10 points, for a total of 100 points.

Directions/Steps:

1. Draw 3 parallel roads and name them. (The roads can be real or made up. The examples 3rd Avenue, 4th Avenue, 5th Avenue (Western)) Your map will look much better if you use a ruler to draw the lines for your roads. Also make sure that all roads are the same width.
2. Draw 3 roads that are each perpendicular to at least one of the 3 parallel lines, and name these roads.
3. Draw 3 intersecting roads on your map. They may intersect each other, or any of the other roads. These roads intersect, but are not perpendicular. Name these roads.
4. Take a sheet of construction paper. Place your ruler diagonally on the paper. Mark at the 1", 1", and 1" measurements on both sides of the paper. Draw a straight line across the paper. Repeat place the ruler across the top of your paper. Mark at the 1" and 1" measurements. The ruler splits at the bottom of the paper. Use these points to draw straight lines to a grid on the paper.

You should now have 12 squares on your sheet of construction paper that are each 1" x 1". You will use these squares to create 10 different polygonal shapes, which you will cut out and glue onto your poster board. The shapes that you will need to create are:

Triangle	Square	Hexagon	Heptagon	Decagon
Pentagon	Nonagon	Octagon	Dodecagon	Tridecagon

5. The polygons created in step 4 are the buildings in your town. Each building needs to have a mathematical name on the paper.

The Nature of Order: The process of creating life Christopher Alexander, 2002 This four volume work allows the reader to form one picture of the world in which the perspectives from science beauty and grace and commonsense intuitions are interlaced The Nature of Order, Book Two: The Process of Creating Life Christopher Alexander, 2020-03-30 Scientifically this is perhaps the most exciting of the four books How do beautiful creations come into being Nature can make an infinite number of human faces each one unique each one beautiful The same is true for daffodils streams and stars But man made creations especially the towns and buildings of the 20th century have only occasionally been really good more often mediocre and in the last 50 years have most often been deadly What is the reason for the difference It hinges on the deep nature of the processes we use Merely understanding the geometry of beautiful and living form the topic of Book 1 is not enough to help us create such a living geometry In the 20th century our society was locked into deadly processes which created our current built environment process that most people were not really aware of and did not question Despite their best efforts and intentions architects and planners working within these processes could not achieve a living built environment Life and beauty in the built world arise only from processes which allow living structure to unfold The secret lies in knowing as nature does what must happen in what order what sequence of events allows a living form to unfold successfully Here in Book 2 Alexander puts forward a fully developed theory of living process He defines conditions for a process to be living that is capable of generating living structure He shows how such processes work and how they may be created At the core of the new theory is the theory of structure preserving transformations This concept new in scientific thinking is based on the concept of wholeness defined in Book 1 A structure preserving transformation is one which preserves extends and enhances the wholeness of a system Structure preserving transformations provide the means for any step by step process social biological architectural or technical to reach configurations which are most profound most capable of supporting life The process of creation whether in the formation of a single object or in the piece meal aggregation of a town requires this sort of generative process a careful and deliberate sequence of steps in which each step creates the context for the next one and each next wholeness is derived from the previous wholeness Our billions of beautiful and unique human faces come from one class of sequences Driven by these sequences an initial cell differentiates again and again until beautiful and complex human beings emerge infinitely various always harmonious Making changes in society so that streets buildings rooms gardens and towns may be generated by hundreds of such sequences requires massive transformations This book is the first blueprint of those transformations LIFE ,1962-02-23 LIFE Magazine is the treasured photographic magazine that chronicled the 20th Century It now lives on at LIFE com the largest most amazing collection of professional photography on the internet Users can browse search and view photos of today s people and events They have free access to share print and post images for personal use The Permaculture City Toby Hemenway, 2015-07-31 Permaculture is more

than just the latest buzzword it offers positive solutions for many of the environmental and social challenges confronting us And nowhere are those remedies more needed and desired than in our cities The Permaculture City provides practical guidance and plenty of examples for creating abundant food energy security close knit communities local and meaningful livelihoods and sustainable policies in our cities and towns Permaculturists have learned that the same nature based approach that works so beautifully for growing food connecting the pieces of the landscape together in harmonious ways applies perfectly to many of our other needs This book shows in the stories of the innovators who are doing it as well as in how to instructions how permaculture design can help town dwellers solve the challenges of meeting our needs for food water shelter energy community and livelihood in sustainable resilient ways **Fuzzy States and Complex Trajectories** ,2009

China Homegrown Andong Lu, Pingping Dou, 2019-02-07 Today architecture in China is at a watershed Over the last decade rapid urbanisation and the burgeoning economy turned the country into a playground for the world s signature architects making it possible to realise extravagant forms and structures at a vast scale The Chinese government has now drawn a line under this phenomenon by issuing a directive calling an end to the oversized xenocentric weird buildings devoid of character or cultural heritage that have sprung up across the country requiring that urban architecture be suitable economic green and pleasing to the eye This government directive comes at a time when homegrown architecture has become increasingly self assured and reflective in its approach A new generation of architects in China in their 30s and 40s are emerging and in a wholly contemporary way they are exploring local responses to often bewildering urban and rural conditions and serious social and environmental challenges This is often expressed through a revival of interest in traditional street patterns courtyards and gardens At the same time architects are also recognising the opportunities to harness the potential of China s established manufacturing base to develop prefabricated building systems Innovative practices are employing new modes of working such as research based studio teaching and exhibitions field workshops cross disciplinary collaboration laboratory based practice design think tanks and collective projects generating a vibrant culture of design research Contributors Lu Feng Murray Fraser Xiao Fu and Wei You Xiahong Hua and Shen Zhuang Xinggang Li Yichun Liu James Shen Yehao Song Hui Wang Shuo Wang Xin Wang and Qiuye Jin Philip F Yuan and Xiang Wang Li Zhang Xin Zhang and Jingxiang Zhu Featured architects Archi Union Architects Atelier Archmixing Atelier Deshaus Atelier Li Xinggang Integrated Architecture Studio Land Studio META Project People s Architecture Office SUP Atelier URBANUS and Zaoyuan Gardening Studio City and Cosmos Keith D. Lilley, 2009-09-01 In City and Cosmos Keith D Lilley argues that the medieval mind considered the city truly a microcosm much more than a collection of houses a city also represented a scaled down version of the very order and organization of the cosmos Drawing upon a Town and Country in the Middle Ages: Contrasts, Contacts and Interconnections, 1100-1500: No. 22 Christopher Dyer, Kate Giles, 2024-11-01 Proceedings of the Society s conference held at the University of York in April 2002 This book brings together the papers presented at the

Society for Medieval Archaeology's spring conference held in York in 2002. The conference set out to reunite urban and rural archaeology. Papers define the differences between town and country, compare the two ways of life, trace the interconnecting links between townspeople and country dwellers and show how they interacted and influenced one another. Contributors include archaeologists concerned with artefacts, buildings, environment and regions; historical geographers working on urban space; and historians interested in material culture.

Littell, 1870 *The Living Age*, 1870 *Representing from Life in Seventeenth-century Italy* Sheila McTighe, 2025-10-01. In drawing or painting from live models and real landscapes more was at stake for artists in early modern Italy than achieving greater naturalism. To work with the model in front of your eyes and to retain their identity in the finished work of art had an impact on concepts of artistry and authorship, the authority of the image as a source of knowledge, the boundaries between repetition and invention and even the relation of images to words. This book focuses on artists who worked in Italy, both native Italians and migrants from northern Europe. The practice of depicting from life became a self-conscious departure from the norms of Italian art. In the context of court culture in Rome and Florence, works by artists ranging from Caravaggio to Claude Lorrain, Pieter van Laer to Jacques Callot reveal new aspects of their artistic practice and its critical implications.

Introduction to Urban Science Luis M. A. Bettencourt, 2021-08-17. A novel integrative approach to cities as complex adaptive systems applicable to issues ranging from innovation to economic prosperity to settlement patterns. Human beings around the world increasingly live in urban environments. In *Introduction to Urban Science* Luis Bettencourt takes a novel integrative approach to understanding cities as complex adaptive systems, claiming that they require us to frame the field of urban science in a way that goes beyond existing theory in such traditional disciplines as sociology, geography and economics. He explores the processes facilitated by and in many cases unleashed for the first time by urban life through the lenses of social heterogeneity, complex networks, scaling, circular causality and information. Though the idea that cities are complex adaptive systems has become mainstream, until now those who study cities have lacked a comprehensive theoretical framework for understanding cities and urbanization, for generating useful and falsifiable predictions and for constructing a solid body of empirical evidence so that the discipline of urban science can continue to develop. Bettencourt applies his

framework to such issues as innovation and development across scales human reasoning and strategic decision making patterns of settlement and mobility and their influence on socioeconomic life and resource use inequality and inequity biodiversity and the challenges of sustainable development in both high and low income nations It is crucial says Bettencourt to realize that cities are not zero sum games and that knowledge human cooperation and collective action can build a better future
