

Subsequently the Saracen war, too, ended in a victory which matched its drawn-out nature. Wars in Sicily (805) and Lombardy came next, but they did not last long; they were both brought to a swift conclusion under the direction of the young Charles.¹

The last war which Charlemagne undertook was against the Northmen who are called Danes (804-10). They too were a great fleet. Their King Godfred was so pulled up with rage against them that he planned to make himself master of the whole of Germany. He had come to look upon Frisia and Saxony as provinces belonging to him; and he had already reduced the Alabans, who were his neighbours, to a state of subservience and made them pay him tribute. Now he boasted that he would soon come with a large army to Aachen itself, where the King had his court. There was a lot of people to believe his boasting, however empty it really was. He was really considered to be on the point of ending one and making another, and was only prevented from doing so by the fact that he died suddenly. He was killed by one of his own soldiers, who in his own life and the war which he had waged both ran a sudden end.

These, then, are the wars which this powerful King Charlemagne waged with such prudence and success in various parts of the world throughout a period of forty-seven years, that is during the whole of his reign. The Frankish kingdom which he inherited from his father Pepin was already far-flung and powerful. By then war of his had increased it to such an extent that he added to it almost a third again. Originally no more land was occupied by the Latins than in the parts they were called, that is the regions of Gaul which lay between the Rhine, the Loire, the Atlantic Ocean and the sea round the British Islands, together with the parts of Germany which lay around the Rhine, the Danube, the Elbe and the Saale, which lay over Saxony, the Danube, the Elbe and the Saale, which lay over Saxony, the Danube, the Elbe and the Saale. To this was he added, besides the Thuringians and the Sorabians. To this was he added, too, the fact that the Alamanni and the Bavarians joined part of the Frankish kingdom. By the campaigns which I have detailed, Charlemagne annexed Aquitaine,² Germany, the whole mountain range of the Pyrenees and land stretching as far south as the first

¹ The war against the Lombards, in 800, was not successful, and they were given in 801.

² Charlemagne added Aquitaine to make Charlemagne's empire more complete.
