

Lifting the Veil of Mental Illness

An Approach to Anthroposophical Psychology

Mental illnesses are too often seen only in abstract terms. In keeping with this, mainstream psychology, which seldom acknowledges the psyche or soul, relies increasingly on pharmaceutical treatment.

In his unique approach to anthroposophic psychology, or *psychosophy*, Dr. Bento views imbalances of the human soul in an experiential and human way. Basing his views on the work of Rudolf Steiner, he looks not only at the human body, soul, and spirit, but also at the way the whole environment of physical phenomena, life forces, and spirit beings affects us as individuals. Going well beyond our immediate, earthly surroundings, the author considers the cosmic effects of Sun, Moon, planets, and stars, offering a holistic view of the human soul.

This book is a valuable addition to the field of anthroposophic psychology and to the study of Spiritual Science as a whole.

William Bento, PhD, worked in the field of human development for more than thirty years. He was a recognized pioneer and a published author in psychosophy (soul wisdom) and astrosophy (star wisdom), and traveled extensively as a speaker, teacher, and consultant. Dr. Bento was the Associate Dean of Academic Affairs at Rudolf Steiner College in Fair Oaks, California, and worked as a transpersonal clinical psychologist at the Center for Living Health in Gold River, California. He also guided social therapy seminars for Camphill Communities for more than twenty years. Dr. Bento was also the author of *Holy Nights Journal and Meditation Cards & Booklet on the Eightfold Path* and a frequent contributor to *Journal for Star Wisdom*. He died June 5, 2015.

W. Zeylmans van Emmichoven,1983-03 A new psychology of the human soul Use of the word soul to denote the inner world of human experience has not been fashionable in the psychology of recent times However as Zeylmans van Emmichoven stresses in this groundbreaking study human inner life is always active as a whole entity which calls for recognition of the soul as a significant aspect of the human entity Drawing on the works of Goethe Franz Brentano Edmund

Husserl Max Scheler and Rudolf Steiner this original approach to psychology uses the soul's own self perception as the method of clarifying the mysteries of the inner life The soul as an inner world participates in two worlds an external world and a still deeper interior world The soul is revealed as a mediator between the outer physical world including the body and the inner core of the human being the I or true self Through its intentional relationship to these two worlds an ever shifting stream of dynamic polarities courses continuously through the soul love hate joy sorrow pleasure displeasure desire satisfaction laughing weeping life consciousness Many soul processes are explored in this context including doubt will mental images perceiving judgment and decision time and space experience and sexual identity as well as how the soul expresses itself in the language of dreams in everyday speech in posture in temperament and in character In addition Van Emmichoven proposes yet another dimension of the human soul through the idea of the soul's drive for development which unfolds through the Goethean laws of polarity enhancement and metamorphosis He paints a profound picture of the higher aim of human life the soul's gradual liberation from physical bonds to become an organ for the I yet always balanced by the soul's inclination to become an organ for the body Along this unfinished journey toward a full human existence he describes the roles played by love by wisdom and by inner death and resurrection As van Emmichoven points out with this understanding of the soul it is clear that there is an area where psychology and a philosophy of life overlap and indeed cannot be entirely separated If we were to define how the understanding of the soul represented in this book is related to contemporary schools of thought there are three thinkers Herder Goethe and Steiner whose spiritual outlook has had a decisive influence The fact that none of these thinkers became particularly well known in this field is not so surprising if we take into account the comprehensive wisdom and spiritual depth which distinguish their works from the introduction This book is a translation from Dutch of *De Menselijke Ziel* 1946 Global Mental Health Brandon A Kohrt, Emily Mendenhall, 2016-07-01 While there is increasing political interest in research and policy making for global mental health there remain major gaps in the education of students in health fields for understanding the complexities of diverse mental health conditions Drawing on the experience of many well known experts in this area this book uses engaging narratives to illustrate that mental illnesses are not only problems experienced by individuals but must also be understood and treated at the social and cultural levels The book includes discussion of traditional versus biomedical beliefs about mental illness the role of culture in mental illness intersections between religion and mental health intersections of mind and body and access to health care is ideal for courses on global mental health in psychology public health and anthropology departments and other health related programs
