The New Reproductive Order Sarah Franklin,Marcia C. Inhorn,2025-04-22 The transformative impact of new reproductive technologies over the past half century Both fertility and infertility are commonly depicted as individual biological and choice dependent conditions that can be mediated by technology In contrast The New Reproductive Order documents the complex material historical and political forces that both enable and limit human reproductivity while also arguing that both fertility and infertility have become condensed symbols of wider changes to family forms national political agendas global economies and local environments Combining anthropological sociological and intersectional feminist research from across the globe this landmark volume reveals how changing perceptions of fertility and infertility are altering how people imagine pursue and experience reproductivity both individually and collectively Using a comparative global methodology based on detailed case studies The New Reproductive Order persuasively argues that changing perceptions of fertility and infertility are giving rise to a distinctive reproductive politics based on new models of reproductive cause and effect This groundbreaking and sophisticated volume opens new horizons of scholarship on the relationship between fertility infertility reproductive technologies and social change as well as new thinking on policy practice and activism in the twenty first century s new reproductive order

The Fertility Transition in Iran Mohammad Jalal Abbasi-Shavazi,Peter McDonald,Meimanat Hosseini-Chavoshi,2009-09-30 Confounding all conventional wisdom the fertility rate in the Islamic Republic of Iran fell from around 7 0 births per woman in the early 1980s to 1 9 births per woman in 2006 That this the largest and fastest fall in fertility ever recorded should have occurred in one of the world s few Islamic

Republics demands explanation This book based upon a decade of research is the first to attempt such an explanation The book documents the progress of the fertility decline and displays its association with social and economic characteristics It addresses an explanation of the phenomenal fall of fertility in this Islamic context by considering the relevance of standard theories of fertility transition The book is rich in data as well as the application of different demographic methods to interpret the data All the available national demographic data are used in addition to two major surveys conducted by the authors Demographic description is preceded by a socio political history of Iran in recent decades providing a context for the demographic changes The authors conclude with their views on the importance of specific socio economic and political changes to the demographic transition Their concluding arguments suggest continued low fertility in Iran The book is recommended to not only demographers social scientists and gender specialists but also to policy makers and those who are interested in social and demographic changes in Iran and other Islamic countries in the Middle East It is also a useful reference for demography students and researchers who are interested in applying fertility theories in designing surveys and analysing data
