The Complete book on Natural Dyes & Pigments NIIR Board of Consultants & Engineers, 2005-10-04 Natural dyes are dyes or colorants derived from plants invertebrates or minerals The majority of natural dyes are vegetable dyes from plant sources Dyeing is the process of imparting colors to a textile material Different classes of dyes are used for different types of fiber and at different stages of the textile production process from loose fibers through yarn and cloth to completed garments There are technologies that manufacture the pigments for plastics rubber and cosmetics Therefore dyes and pigments have a vast area of applications and have a huge demand in industry Contrary to popular opinion natural dyes are often neither safer nor more ecologically sound than synthetic dyes They are less permanent more difficult to apply wash out more easily and often involve the use of highly toxic mordant Of course the colour possibilities are far more limited the color of any natural dye may be easily copied by mixing synthetic dyes but many other colors are not easily obtained with natural dyes However some mordant are not very toxic and the idea of natural dyestuffs is aesthetically pleasing Applying natural dyes in your fabric production using enzymes will reduce your production cost and improve control There are various kind of natural dyes quinonoid dyes cyanine dyes azo dyes biflavonyl dyes omochromes anthraquinone coprosmas etc The use of natural dyes in cloth making can be seen as a necessary luxury to trigger off a change in habits Dyes which stand out for their beauty and ecological attributes would never be employed on just any material but on noble fabrics such as wool silk linen or cotton made to last more than one season Market value will benefit from consumer preferences for environmentally friendly products which will support consumption of high performance dyes and organic pigments This book basically deals with the use of carotenoids as food colours bianthraquinones and related compounds intermediate degradation products of biflavonyls dyestuffs containing nuclear sulphonic and carboxylic acid
