

3.5 Nomenclature de définition

NF E 04-504 - ISO 7573

La nomenclature est une liste complète des éléments qui constituent un ensemble. Sa liaison avec le dessin est assurée par des repères.

ÉTABLISSEMENT D'UNE NOMENCLATURE

1° On commence par repérer chaque pièce sur le dessin d'ensemble par un numéro.

L'ordre de ces numéros est croissant et il indique approximativement l'ordre du montage des pièces, à l'exception de certaines d'entre elles (axes, goupilles, ressorts, pièces normalisées) que l'on groupe généralement par catégories.

- Aligner les repères.
- Mettre un point à l'extrémité de la ligne d'attache du repère si elle se termine à l'intérieur d'une pièce. Mettre une flèche si elle s'arrête sur son contour.
- Ménager périodiquement des repères libres. Ils pourront être utilisés si l'on ajoute, lors de mises à jour, de nouvelles pièces (dans l'exemple, le repère 9 est un repère libre).

2° On établit ensuite la nomenclature :

- soit sur un document séparé ;
- soit sur le dessin lui-même ; dans ce cas, son sens de lecture est celui du dessin.

Emplacement de la nomenclature

Sur un dessin

Guide Du Dessinateur Industriel Chevalier 2015

Chao Zhang

Guide Du Dessinateur Industriel Chevalier 2015:

Machining, Joining and Modifications of Advanced Materials Andreas Öchsner, Holm Altenbach, 2016-06-23 This book presents the latest advances in mechanical and materials engineering applied to the machining joining and modification of modern engineering materials The contributions cover the classical fields of casting forming and injection moulding as representative manufacturing methods whereas additive manufacturing methods rapid prototyping and laser sintering are treated as more innovative and recent technologies that are paving the way for the manufacturing of shapes and features that traditional methods are unable to deliver The book also explores water jet cutting as an innovative cutting technology that avoids the heat build up typical of classical mechanical cutting It introduces readers to laser cutting as an alternative technology for the separation of materials and to classical bonding and friction stir welding approaches in the context of joining technologies In many cases forming and machining technologies require additional post treatment to achieve the required level of surface quality or to furnish a protective layer Accordingly sections on laser treatment shot peening and the production of protective layers round out the book s coverage
