Savoring Alternative Food Jessica Hayes-Conroy, 2014-09-19 Advocates of the alternative food movement often insist that food is our common ground that through the very basic human need to eat we all become entwined in a network of mutual solidarity In this challenging book the author explores the contradictions and shortcomings of alternative food activism by examining specific endeavours of the movement through various lenses of social difference including class race gender and age While the solidarity adage has inspired many it is shown that this has also had the unfortunate effect of promoting sameness over difference eschewing inequities in an effort to focus on being together at the table The author explores questions of who belongs at the table of alternative food and who gets to decide what is eaten there and what is at stake when alternative food practices become the model for what is right to eat Case studies are presented based on fieldwork in two distinct loci of alternative food organizing school gardens and slow food movements in Berkeley California and rural Nova Scotia The stories take social difference as a starting point but they also focus specifically on the complexities of sensory experience how material bodies take up social difference both confirming and disrupting it in the visceral processes of eating Overall the book demonstrates the importance of moving beyond a promotion of universal shoulds of eating and towards a practice of food activism that is more sensitive to issues of social and material difference *Forthcoming Books* Rose Arny, 2003 **Terraced Landscapes** Drago Kladnik, 2017-09-01 Terraced landscapes with agricultural terraces are cultural landscapes with a special value They provide food and also have priceless scientific cultural historical ecological aesthetic and even psychological philosophical and religious value They form a unique agricultural and ecological system that

can be found throughout the world In some developed civilizations they were created in an organized manner over millennia and in others they arose completely spontaneously as people adapted to natural conditions and improved their opportunities to make a living They therefore reflect a harmony between man and nature and in many cases also between people themselves This volume presents them in pictures and words in all their diversity and attractiveness After discussing the global and European dimensions of terraced landscapes and their agricultural terraces the volume focuses on Slovenian terraced landscapes they are discussed separately by landscape types and sample cases in the territory of selected settlements pilot areas The conclusion also draws attention to the exceptional value and appeal of non agricultural terraced landscapes that have been shaped by nature and man _____ Terasirane pokrajine sestavljene iz kmetijskih teras so kulturne pokrajine s posebno vrednostjo Zagotavljajo hrano imajo pa tudi neprecenljivo znanstveno kulturno zgodovinsko ekološko estetsko celo psihološko in filozofsko in religiozno vrednost So svojstven kmetijski in ekološki sistem po celem svetu Ponekod so v razvitih civilizacijah organizirano nastajale skozi tisoletja drugje pa povsem spontano ko se je lovek prilagajal naravnim razmeram in izboljševal svoje možnosti za preživetje Zato se v njih zrcali sožitje med lovekom in naravo marsikje pa tudi med ljudmi Knjiga jih v sliki in besedi predstavlja v vsej njihovi pestrosti in privlačnosti Najprej so izpostavljene svetovne in evropske razsežnosti terasiranih pokrajin in njihovih kmetijskih teras precej prostora pa namenja tudi slovenskim terasiranim pokrajinam in sicer ločeno po pokrajinskih tipih in po vzorcu njihovih primerov ki obsegajo območja izbranih naselij V sklepnem delu opozarja tudi na izjemnost in privlačnost nekmetijskih terasiranih pokrajin ki sta jih oblikovala narava in lovek
