What Glasses Are You Wearing?

Have you ever tried to guess or imagine? They change the way things are, don't they? Well, sometimes our brains see your glasses, and we can get tripped about the way things really are. Here are some common "glasses" our brains can wear, and the ways they can take up our things differently.

Distorting the Positive
When your brain doesn't "trust" the good stuff!
If you do well on a test, you might think "I got lucky."
If you get a compliment, you might think "Oh, how kind is she that because that's my friend!"

Mind Reading
These glasses make you think you know what others are thinking. It's a game of hide-it-over-there's. If you look at kids in your class's hallway together, you might think "They are talking about me and laughing about my presentation!"

Convincing
These glasses make you think that what you're thinking about is real. If you look at kids in your class, you might think "I'll never have friends again and I will spend the rest of my life alone!"

Black and White Thinking
When your brain looks only at extremes or "all or nothing". If you forget something for school, you might think "That's it, the whole day is ruined!"

Overgeneralization
When you think about it often in the conclusion. If you make a mistake, you might think "I messed up everything!"

Personalization
When you think about it often in the conclusion. If you make a mistake, you might think "I messed up everything!"
