that a workbook for NEP UGCF syllabus is being proposed for helping students acquire prior deep knowledge pertaining to a particular exercise objective and enthuse them by stimulating their scientific thinking through various pre and post lab questions formulated. The current pedagogy demands a reformation in the conduct of the practicals under the new syllabi scheme; therefore, it is anticipated that this manual would be beneficial for the students as well as teachers in rendering the best. Besides, the book encompasses the fundamentals of all the techniques that would equip the practitioners with specific skills, especially on various purification techniques such as recrystallization and chromatography, without which one cannot think about proceeding with any synthesis in any of the chemical, pharmaceutical, textile, oil, and petroleum industries and more.
