2. What are the main components of a telecommunications system?

The main components include transmitters, receivers, transmission media (such as cables or wireless signals), switches, routers, and communication protocols.

3. What are the different types of telecommunications networks?

Cellular networks divide a geographic area into cells, each served by a base station. Mobile devices communicate with the nearest base station, which connects them to the telecommunications network. As a mobile device moves between cells, the network seamlessly hands off the connection to maintain continuity.
