Het Yellowstonepark Experimentele Evolutie:

Het Yellowstone-Park ; Experimentele evolutie Hugo de Vries,1911 **Langs de mysterieuze grenzen van het leven** J. Lever,2006 Gebundelde opstellen over biologie evolutie en geloof door de gereformeerde oud hoogleraar dierkunde

Gregor Mendel and the Foundation of Genetics Vítězslav Orel,Anna Matalová,1983 *Het Yellowstone-Park* Hugo de Vries,2023-02-05 In *Het Yellowstone Park* biedt Hugo de Vries een gedetailleerde verkenning van een van de meest opmerkelijke natuurlijke gebieden op aarde Het boek beschrijft de diverse ecosystemen binnen het park met een focus op het samenspel tussen flora en fauna De Vries een vooraanstaande botanist en geneticus hanteert een heldere beschrijvende stijl die zowel toegankelijk als informatief is Zijn observaties worden niet alleen ondersteund door wetenschappelijke gegevens maar ook door poëtische beschrijvingen van de natuurlijke schoonheid van Yellowstone waardoor het boek zowel educatief als inspirerend is in de context van de opkomende milieubeweging in de vroege 20e eeuw Hugo de Vries geboren in 1848 in Nederland was een invloedrijke figuur in de ontwikkeling van de genetica en de moderne biologie Zijn wetenschappelijke achtergrond en passie voor de natuur brachten hem naar Yellowstone waar hij niet alleen het landschap bestudeerde maar ook de implicaties van natuurbescherming in een tijd dat industrialisatie de natuur bedreigde De Vries diepgaande kennis stelt hem in staat om complexe wetenschappelijke ideeën te vertalen naar verstaanbare en boeiende proza Dit boek is een must read voor natuur en milieuliefhebbers alsook voor diegenen die geïnteresseerd zijn in de geschiedenis van ecologie en natuurbescherming De Vries combinatie van persoonlijke ervaring en wetenschappelijke waarneming biedt een unieke kijk op Yellowstone en nodigt de lezer uit om de natuur met nieuwe ogen te aanschouwen Het doet een oproep tot bewustwording en waardering van onze natuurlijke wereld wat het des te relevanter maakt in het huidige tijdperk van milieuproblemen

Bibliography of Natural History Travel Narratives Anne S. Troelstra,2017-06-01 Anne Troelstra's fine bibliography is an outstanding and ground breaking work He has provided the academic world with a long needed bibliographical record of human endeavour in the field of the natural sciences The travel narratives listed here encompass all aspects of the natural world in every part of the globe but are especially concerned with its fauna flora and fossil remains Such eyewitness accounts have always fascinated their readers but they were never written solely for entertainment fragmentary though they often are these narratives of travel and exploration are of immense importance for our scientific understanding of life on earth providing us with a window on an ever changing and often vanishing natural world Without such records of the past we could not track document or understand the significance of changes that are so important for the study of zoogeography With this book Troelstra gives us a superb overview of natural history travel narratives The well over four thousand detailed entries ranging over four centuries and all major western European languages are drawn from a wide range of sources and include both printed books and periodical contributions While no subject bibliography by a single author can attain absolute completeness Troelstra's work is comprehensive to a truly remarkable degree The entries are arranged alphabetically by

author and chronologically by the year of first publication under the author's name. A brief biography with the scope and range of their work is given for each author. Every title is set in context; the contents, including illustrations, are described, and all known editions and translations are cited. In addition, there is a geographical index that cross-refers between authors and the regions visited, and a full list of the bibliographical and biographical sources used in compiling the bibliography.

Dictionary Catalog of the Research Libraries of the New York Public Library, 1911-1971 New York Public Library.

Research Libraries, 1979 **Concepts of Earth Science & Chemistry Parent Lesson Plan** John Hudson Tiner, 2013-08-26

Concepts of Earth and Chemistry Course Description This is the suggested course sequence that allows one core area of science to be studied per semester. You can change the sequence of the semesters per the needs or interests of your student. Materials for each semester are independent of one another to allow flexibility. Semester 1: Earth. Blending a creationism perspective of history with definitions of terms and identification of famous explorers/scientists etc. This book gives students an excellent initial knowledge of people and places, encouraging them to continue their studies in depth. Semester 2: Chemistry. Chemistry is an amazing branch of science that affects us every day, yet few people realize it or even give it much thought. Without chemistry, there would be nothing made of plastic, there would be no rubber tires, no tin cans, no televisions, no microwave ovens, or something as simple as wax paper. This book presents an exciting and intriguing tour through the realm of chemistry as each chapter unfolds with facts and stories about the discoveries of discoverers. Find out why pure gold is not used for jewelry or coins. Join Humphry Davy as he made many chemical discoveries and learn how they shortened his life. See how people in the 1870s could jump over the top of the Washington Monument. Exploring the World of Chemistry brings science to life and is a wonderful learning tool with many illustrations and biographical information. Dictionary

of Congress Printed Cards Issued to July 31, 1942, 1942 *A Catalog of Books Represented by Library of Congress Printed Cards. Supplement: Cards Issued August 1, 1942--December 31, 1947*, 1948 *Catalog of Printed Books* Bancroft Library, 1964 **Het Yellowstone-Park** Hugo de Vries, 1907 **Het Yellowstone Park** Hugo de Vries, 1900 Het

Yellowstone-park Hugo de Vries, 1905 *Myth and History in the Creation of Yellowstone National Park* Paul Schullery, Lee H. Whittlesey, 2003. Does a beloved institution need its own myths to survive? Can conservationists avoid turning their heroes into legends? Should they try Yellowstone National Park, a global icon of conservation and natural beauty, was born at the most improbable of times: the American Gilded Age, when altruism seemed extinct and society's vision seemed focused on only greed and growth. Perhaps that is why the park's creation myth portrayed a few saintlike pioneer conservationists laboring to set aside this unique wilderness against all odds. In fact, the establishment of Yellowstone was the result of complex social, scientific, economic, and aesthetic forces. Its creators were not saints but mortal humans with the full range of ideals and

impulses known to the species Authors Paul Schullery and Lee Whittlesey both longtime students of Yellowstone s complex history present the first full account of how the fairy tale origins of the park found universal public acceptance and the long painful process by which the myth was reconsidered and replaced with a more realistic and ultimately more satisfying story In this evocative exploration of Yellowstone s creation myth the authors trace the evolution of the legend its rise to incontrovertible truth and its revelation as a mysterious and troubling episode that remains part folklore part wish and part history This study demonstrates the passions stirred by any challenge to cherished national memories just as it honors the ideals and dreams represented by our national myths

Het Yellowstone-park Hugo de Vries,1911 **Geological History of the Yellowstone National Park** Arnold Hague,1888 **Early History of Yellowstone National Park and Its Relation to National Park Policies** Louis Convers Cramton,1932 **Geological History of the Yellowstone National Park** Arnold Hague,1921
