Bifurcation and Chaos: Analysis, Algorithms, Applications KÜPPER, SCHNEIDER, SEYDEL, TROGER, 2012-12-06 This volume contains the proceedings of a conference held in Würzburg August 20-24 1990 The theme of the conference was Bifurcation and Chaos Analysis Algorithms Applications More than 100 scientists from 21 countries presented 80 contributions Many of the results of the conference are described in the 49 refereed papers that follow The conference was sponsored by the Deutsche Forschungsgemeinschaft and by the Deutscher Akademischer Austauschdienst We gratefully acknowledge the support from these agencies The science of nonlinear phenomena is evolving rapidly Over the last 10 years the emphasis has been gradually shifting How trends vary may be seen by comparing these proceedings with previous ones in particular with the conference held in Dortmund 1986 proceedings published in ISNM 79 Concerning the range of phenomena chaos has joined the bifurcation scenarios As expected the acceptance of chaos is less emotional among professionals than it has been in some popular publications Analytical methods appear to have reached a state in which basic results of singularities symmetry groups or normal forms are everyday experience rather than exciting news Similarly numerical algorithms for frequent situations are now well established Implemented in several packages such algorithms have become standard means for attacking nonlinear problems The sophistication that analytical and numerical methods have reached supports the vigorous trend to more and more applications Pioneering equations as those named after Duffing Van der Pol or Lorenz are no longer exclusively the state of art

Analysis, Geometry and Topology of Elliptic Operators Bernhelm Booss, 2006 Modern theory of elliptic operators or simply elliptic theory has been shaped by the Atiyah-Singer Index Theorem created 40 years ago Reviewing elliptic theory over a broad range 32 leading scientists from 14 different countries present recent developments in topology heat kernel techniques spectral invariants and cutting and pasting noncommutative geometry and theoretical particle string and membrane physics and Hamiltonian dynamics The first of its kind this volume is ideally suited to graduate students and researchers interested in careful expositions of newly evolved achievements and perspectives in elliptic theory The contributions are based on lectures presented at a workshop acknowledging Krzysztof P Wojciechowski's work in the theory of elliptic operators

Foundations of Probabilistic Logic

Programming Fabrizio Riguzzi, 2023-07-07 Since its birth the field of Probabilistic Logic Programming has seen a steady increase of activity with many proposals for languages and algorithms for inference and learning This book aims at providing an overview of the field with a special emphasis on languages under the Distribution Semantics one of the most influential approaches The book presents the main ideas for semantics inference and learning and highlights connections between the methods Many examples of the book include a link to a page of the web application <http://cplint.eu> where the code can be run online This 2nd edition aims at reporting the most exciting novelties in the field since the publication of the 1st edition The semantics for hybrid programs with function symbols was placed on a sound footing Probabilistic Answer Set Programming gained a lot of interest together with the studies on the complexity of inference Algorithms for solving the MPE and MAP tasks are now available Inference for hybrid programs has changed dramatically with the introduction of Weighted Model Integration With respect to learning the first approaches for neuro symbolic integration have appeared together with algorithms for learning the structure for hybrid programs Moreover given the cost of learning PLPs various works proposed language restrictions to speed up learning and improve its scaling Farm Journal ,1993 *Kubota Shop Manual* ,1986
