Storytime Brenda S. Copeland, Patricia A. Messner, 2013-04-23 This book is an invaluable resource for school library aides who conduct storytime activities providing everything from instruction on how to read to children to a week by week read aloud curriculum for the entire school year. School Library Storytime Just the Basics is the perfect resource for library aides, paraprofessionals or other library staff who conduct storytime in a school library media center. It provides all of the essential information, materials, and step by step guidance needed to facilitate these all important events for children in kindergarten through second grade, allowing library staff without previous training or experience to get started with confidence. The fifth title in the highly regarded Just the Basics series, this book starts with an introduction followed by explanations of how to read aloud and tips for managing and working with children in the primary grades. The authors suggest specific picture books that tie into school year based themes and supply materials that can be used as listed or easily modified to meet the individual library's needs. Event specific lessons are supplied for many weeks within the school year, making this title one that educators will rely on for storytime ideas from September through May. **The Clinical Medical Librarian's Handbook**

The book moves quickly through the history of librarians accompanying clinicians on medical wards to the realization of librarians partnering with clinicians in the face of a rapidly changing healthcare scene. Success and challenges are discussed by professional CMLs working in urban academic medical centers. The Clinical Medical Librarians Handbook is intended for any library student, practicing librarian, or health administrator interested in understanding the variety of roles medical librarians play in the healthcare system of the United States, how medical librarians interact with clinicians and patients, the power of patient centered care and technology, the importance of information to public health, novel ways to introduce and teach clinical learners to use
