*Liddell Hart and the Weight of History* John J. Mearsheimer, 2010 This troubling book offers a striking illustration of how history can be used and abused how a gifted individual can create their own self serving version of the past **Liddell Hart and the Weight of History** John J. Mearsheimer, 1988 This troubling book offers a striking illustration of how history can be used and abused how a gifted individual can create their own self serving version of the past Made, Not Born Bruce Newsome, 2007-09-30 Why do the combat capabilities of individual soldiers vary so much This book seeks to provide an answer to this and other questions about variability in combat performance Some soldiers flee quickly from the battlefield while others endure all hardships until the bitter end Some combat units can perform numerous types of missions while others cannot keep themselves organized during peacetime Some militaries armed with obsolete weapons have out fought enemies with the latest weapons just as some massively outnumbered armies have beaten back much larger opponents In this first social scientific study of the effectiveness of combat troops Newsome evaluates competing explanations for the varying combat capabilities and performances There are four main explanations each emphasizing the influence of a single factor The first focuses on material endowments How well funded are the troops Do they have the latest protective gear and the most advanced weaponry Second some analysts claim that democracies produce better commanders superior strategies more motivated personnel or better managed personnel others however associated those characteristics with more authoritarian forms of government Third is the idea that giving more power to the troops on the ground in individual combat units empowers them with decision making capability and adaptability to fast changing situations and circumstances Newsome presents evidence that decentralized personnel management does correlate with superior combat performance Fourth soldier capabilities and performance often are assumed to reflect intrinsic attributes such as prior civilian values Newsome argues that the capabilities of combat soldiers are acquired through military training and other forms of conditioning but he does not entirely discount the role of a soldier s individual character In the age old nature vs nurture argument he finds that intrinsic qualities do count but that extrinsic factors such as training and environment matter even more **War of Time** Jan Hanska, 2020-07-08 This book examines the meaning and management of time as a facet of the art of war in general but especially operational art While force time place has for a long time been considered to be the essential trinity of warfare the aspect of time remains largely under researched Relying on classic texts on art of war the author engages with some of the top theorists and practitioners of art of war from the age of Sun Tzu to the network centric warfare about the role of time and its management in operational art Relying on Alvin Toffler s theory of the three waves the volume follows research into development of operational art through cycles from the agrarian age to the industrial age and into the information age **NL ARMS Netherlands Annual Review of Military Studies 2019** Wim Klinkert, Myriame Bollen, Marenne Jansen, Henk de Jong, Eric-Hans Kramer, Lisette Vos, 2019-07-16 This book has as its subject matter the

academic education of officers and builds on the signing of the Bologna Declaration in 1999 by twenty nine European ministers for Education and Science who thereby agreed to coordinate higher education across Europe by for instance the implementation of the Bachelor s and Master s system In the meantime military academies have also introduced the BaMa system into their programs for officers education which marks a transition from the old days when officers education took place within a national military system under military command and was firmly grounded in principles traditions and needs as professed by the Ministries of Defence and the armed forces in particular So the Bologna Declaration can be seen as crucial leverage for the development of in house academic degree programs as a fundamental part of officers education With this volume the editors of NL ARMS 2019 strive to offer a platform to both academics and military and civilian practitioners as well as to combinations of these to reflect and share their thoughts on officers education before and after Bologna both in The Netherlands and abroad To this end controversies and challenges affecting various aspects and systems of officers education have been grouped into five themes Respectively the first four themes comprise institutional settings and change educational philosophy educational challenges and reflective practices and didactical solutions The fifth theme international perspectives provides insights into the strategic environments and challenges faced by sister academies as well as ways to further officers education across Europe such as offered by Erasmus programs All the editors of this year s volume are affiliated with the Faculty of Military Sciences of the Netherlands Defence Academy in Breda The Netherlands

*Inadvertent Escalation* Barry Posen, 1991 This sobering book demonstrates how the interplay between conventional military operations and nuclear forces could inadvertently produce pressures for nuclear escalation **The Origins of Major War** Dale C. Copeland, 2000-08-03 Copeland asks why governments make decisions that lead to sustain and intensify conflicts drawing on detailed historical narratives of several twentieth century cases including World War I World War II and the Cold War The Transformation of American Air Power Benjamin S. Lambeth, 2000 In this balanced appraisal of air power s newly realized strengths in joint warfare Benjamin Lambeth a defense analyst and civilian pilot who has flown in most of the equipment described in this book explores the extent to which the United States can now rely on air delivered precision weapons in lieu of ground forces to achieve strategic objectives and minimize American casualties Undermining the Kremlin Gregory Mitrovich, 2000 Mitrovich demonstrates that inspiration for these efforts did not originate within the intelligence community but with individuals at the highest levels of policymaking in the U S government BOOK JACKET

Morale Daniel Ussishkin, 2007 **Modern Hatreds** Stuart J. Kaufman, 2015-06-22 Ethnic conflict has been the driving force of wars all over the world yet it remains an enigma What is it about ethnicity that breaks countries apart and drives people to acts of savage violence against their lifelong neighbors Stuart Kaufman rejects the notion of permanent ancient hatreds as the answer Dissatisfied as well with a purely rationalist explanation he finds the roots of ethnic violence in myths and symbols the stories ethnic groups tell about who they are Ethnic wars Kaufman argues result from the politics of these

myths and symbols appeals to flags and faded glories that aim to stir emotions rather than to address interests Popular hostility based on these myths impels groups to follow extremist leaders invoking such emotion laden ethnic symbols If ethnic domination becomes their goal ethnic war is the likely result Kaufman examines contemporary ethnic wars in the Caucasus and southeastern Europe Drawing on information from a variety of sources including visits to the regions and dozens of personal interviews he demonstrates that diplomacy and economic incentives are not enough to prevent or end ethnic wars The key to real conflict resolution is peacebuilding the often overlooked effort by nongovernmental organizations to change hostile attitudes at both the elite and the grassroots levels

The Meaning of the Nuclear Revolution Robert Jervis,1989 A comprehensive analysis that thrusts Jervis into the front ranks of nuclear essayists Kirkus Reviews Robert Jervis argues here that the possibility of nuclear war has created a revolution in military strategy and international relations He examines how the potential for nuclear Armageddon has changed the meaning of war the psychology of statesmanship and the formulation of military policy by the superpowers

Causes of War Stephen Van Evera,1999 What causes war How can military conflicts best be prevented A prominent political scientist here addresses these questions offering ideas that will be widely debated Van Evera s book demonstrates that ideas from the Realist paradigm can offer strong explanations for international conflict and valuable prescriptions for its control

No Exit James McAllister,2018-09-05 James McAllister outlines a new account of early Cold War history one that focuses on the emergence of a bipolar structure of power the continuing importance of the German question and American efforts to create a united Western Europe Challenging the conventional wisdom among both international relations theorists and Cold War historians McAllister argues that America s central objective from the Second World War to the mid 1950s was to create a European order that could be peaceful and stable without requiring the permanent presence of American ground forces on the continent The permanent presence of American forces in Europe is often seen as a lesson that policymakers drew from the disastrous experiences of two world wars but McAllister s archival research reveals that both FDR and Eisenhower as well as influential strategists such as George Kennan did not draw this lesson In the short term American power was necessary to balance the Soviet Union and reassure Western Europe about the revival of German power but America s long term objective was to create the conditions under which Western Europe could take care of both of these problems on their own In the author s view the key element of this strategy was the creation of the European Defense Community If Western Germany could be successfully integrated and rearmed within the context of the EDC Western Europe would have taken the most important step to becoming a superpower on par with the United States and the Soviet Union Understanding why this strategy was pursued and why it failed McAllister asserts has important implications for both international relations theory and contemporary questions of American foreign policy

*A Substitute for Victory* Rosemary Foot,2018-10-18 After more than two years of bitter negotiations during which combatants civilians continued to suffer casualties the Korean armistice was concluded in July 1953 Focusing on the Americans formulation of

negotiating positions on their attempts to coordinate political goals with military tactics Rosemary Foot here charts the tortuous path to peace offers a new explanation for the agonizing length of the talks She also takes into account the role of the Western allies the Indian South Korean North Korean Chinese governments as she examines the complex international setting in which the armistice took place      **Innovation and the Arms Race** Matthew Evangelista,2023-08-15 Innovation and the Arms Race investigates the causes and mechanisms of the technological arms race between the United States and the Soviet Union Challenging the commonly held notion that Soviet weapons innovation processes simply mirror those of the United States Matthew Evangelista shows that the United States usually leads in introducing new military technology while the Soviets typically react to American initiatives Evangelista bases his study of pivotal nuclear weapons development decisions on a variety of US and USSR primary sources including the memoirs of weapons designers and scientists declassified intelligence analyses Soviet Academy of Science documents and Nikita Khrushchev's taped reminiscences He finds that in the United States impetus for innovation comes from the bottom at the initiative of corporate or government researchers and military officials whereas the centralized Soviet system produces innovations from the top in response to foreign developments A revelatory analysis of US military policy Soviet American relations and weaponry development Innovation and the Arms Race bears lessons for the study of great power competition and military innovation today

Anatomy of Mistrust Deborah Welch Larson,2000 Synthesizing different understandings of trust and mistrust from the theoretical traditions of economics psychology and game theory Larson analyzes five cases that might have been turning points in U S Soviet relations      *The Purpose of Intervention* Martha Finnemore,2003 Finnemore examines changes over the past 400 years about why countries intervene militarily as well as in the ways they have intervened      **Rethinking the World** Jeffrey Legro,2005 Stunning shifts in the worldviews of states mark the modern history of international affairs how do societies think about and rethink international order and security Japan's opening German conquest American internationalism Maoist independence and Gorbachev's new thinking molded international conflict and cooperation in their eras How do we explain such momentous changes in foreign policy and in other cases their equally surprising absence The nature of strategic ideas Jeffrey W Legro argues played a critical and overlooked role in these transformations Big changes in foreign policies are rare because it is difficult for individuals to overcome the inertia of entrenched national mentalities Doing so depends on a particular nexus of policy expectations national experience and ready replacement ideas In a sweeping comparative history Legro explores the sources of strategy in the United States and Germany before and after the world wars in Tokugawa Japan and in the Soviet Union He charts the likely future of American primacy and a rising China in the coming century Rethinking the World tells us when and why we can expect changes in the way states think about the world why some ideas win out over others and why some leaders succeed while others fail in redirecting grand strategy      *Divided Union* Scott A. Silverstone,2018-07-05 Between the Revolutionary War and the Civil War the United States was embroiled in

competitive inter state politics Although it did not directly involve itself in European affairs the United States did engage regularly in dangerous struggles with other states and with colonial powers with territory on the American periphery Aside from the War of 1812 the Oregon Crisis and the Mexican War other near misses included here disputes of 1807 and 1809 with Britain with Spain over East Florida in 1811 13 with Mexico in 1853 and disputes with Spain over Cuba in 1853 55 and with Mexico in 1858 1860 have been ignored in the democratic peace literature Scott A Silverstone finds these cases particularly useful for testing alternative explanations of constraints on armed conflict because the United States backed down each time allowing each crisis to pass short of its full potential for violence Silverstone builds on a nascent theory of institutional constraints on the use of force presented in the Federalist Papers to explain American attitudes toward participation in conflicts He argues that the federal character of American democracy that emerged from the founding and the large size of the new American republic provide the keys to understanding its decision making processes Divided Union shows how the institutional features of federal union and the diverse social economic and security interests within this geographically extended republic created political conditions that impeded the use of force by the United States before the Civil War
