1.3 The pulley head height limitation

The pulley head height limitation limits the load pulley to a predetermined height. This sets the limit for jacking upwards and telescopic extension of the boom. The speed of both movements is steadily reduced as they near their programmed limits. Programming is done by moving to the limitation height and confirming this by pressing a button allowing the pulley head height limit to be taken over by the LICOON system. The limit must be programmed by the operator in such a way that, in the event of the boom height shutting down, all of the higher attached parts, such as the neck pulley, the guy rocker etc. are all taken into account.
