## **Life And Death In Intensive Care Life And Death In Intensive Care:**

**Life and Death in Intensive Care** Joan Cassell, 2005 A penetrating look at the values systems and life and death dramas in the world of the surgical intensive care unit      **Life-and-death Decisions in Neonatal Intensive Care** Renee Anspach, 1982      **Speaking for the Dying** Susan P. Shapiro, 2019-06-12 Seven in ten Americans over the age of age of sixty who require medical decisions in the final days of their life lack the capacity to make them For many of us our biggest life and death decisions literally will therefore be made by someone else They will decide whether we live or die between long life and quality of life whether we receive heroic interventions in our final hours and whether we die in a hospital or at home They will determine whether our wishes are honored and choose between fidelity to our interests and what is best for themselves or others Yet despite their critical role we know remarkably little about how our loved ones decide for us Speaking for the Dying tells their story drawing on daily observations over more than two years in two intensive care units in a diverse urban hospital From bed-sides hallways and conference rooms you will hear in their own words how physicians really talk to families and how they respond You will see how decision makers are selected the interventions they weigh in on the information they seek and evaluate the values and memories they draw on the criteria they weigh the outcomes they choose the conflicts they become embroiled in and the challenges they face Observations also provide insight into why some decision makers authorize one aggressive intervention after the next while others do not even on behalf of patients with similar problems and prospects And they expose the limited role of advance directives in structuring the process decision makers follow or the outcomes that result Research has consistently found that choosing life or death for another is one of the most difficult decisions anyone can face sometimes haunting families for decades This book shines a bright light on a role few of us will escape and offers steps that patients and loved ones health care providers lawyers and policymakers could undertake before it is too late      Life and Death on Your Own Terms Lofty L. Basta, 2001-05 This insightful compassionate and lucidly written handbook by a world renowned cardiologist is also a personal testimonial by a surviving cancer patient and an informative guide to end of life issues Dr Basta relies on his medical expertise and first hand experience with a life threatening illness to critique our death denying technologically obsessed culture and gives patients the means to take control of their final days He underscores that physicians the public and society as a whole must come to terms with the unalterable truth that life is finite and that medical intervention beyond a certain point only prolongs suffering When a cure or hope of a better life ceases to be achievable he urges comprehensive palliative care which attends to the patient's physical comfort emotional reassurance and spiritual encouragement To ensure that patients are empowered to provide for their final needs he provides a revolutionary clear simple and medical scenario specific Advance Care Plan which gives each of us the opportunity to execute all important life and death decisions before we are afflicted with a serious health problem and before decisions are irrevocable In sum this book is a tribute to the highly treasured doctor patient relationship Readers who feel

that doctors have lost touch with the patient's perspective will welcome Dr Basta's empathy and caring tone Life and Death Andrew Balfour, 2025-02-25 Life and Death considers ageing and mortality from a psychoanalytic perspective and from the point of view of the individual, the couple and the family. Andrew Balfour's approach focuses on understanding the challenges of late life and what might help us to continue to live our lives and inhabit our relationships as creatively as possible. The book grounds a psychoanalytic approach to understanding later life as a key point of developmental challenge for us all through closely written accounts of the experiences of older people as well as wider social contextual issues. It locates itself at the interface of internal and external realities exploring the lived experience of some of the most difficult things we can face in old age such as dementia and other age-related illnesses and losses. Life and Death will be of interest to psychoanalysts, psychotherapists, counsellors and psychologists in practice and in training. It will also appeal to the general reader interested in ageing and the challenges of late life. Matters of Life and Death David Orentlicher, 2021-03-09

Philosophical debates over the fundamental principles that should guide life and death medical decisions usually occur at a considerable remove from the tough real world choices made in hospital rooms, courthouses and legislatures. David Orentlicher seeks to change that drawing on his extensive experience in both medicine and law to address the translation of moral principle into practice, a move that itself generates important moral concerns. Orentlicher uses controversial life and death issues as case studies for evaluating three models for translating principle into practice. Physician-assisted suicide illustrates the application of generally valid rules, a model that provides predictability and simplicity and more importantly avoids the personal biases that influence case-by-case judgments. The author then takes up the debate over forcing pregnant women to accept treatments to save their fetuses. He uses this issue to weigh the avoidance of perverse incentives, an approach to translation that follows principles hesitantly for fear of generating unintended results. And third, Orentlicher considers the denial of life-sustaining treatment on grounds of medical futility in his evaluation of the tragic choices model which hides difficult life and death choices in order to prevent paralyzing social conflict. Matters of Life and Death is a rich and stimulating contribution to bioethics and law. It is the first book to examine closely the broad problems of translating principle into practice. And by analyzing specific controversies along the way it develops original insights likely to provoke both moral philosophers and those working on thorny issues of life and death. *Critical Care Nursing* Leanne
