Research, Quality, Competitiveness Attilio Stajano, 2008-09-22 The European Union EU was launched as a response to the economic dominance of the United States and to a lesser degree the Soviet Union The nations of Western Europe were too small to compete against large scale and diversified economies on their own Six countries eventually expanding to 27 and counting took a series of steps toward progressively deeper integration the removal of internal tariffs the construction of a common external tariff the elimination of many but not all non tariff barriers leading to a single market and the adoption of a common currency by 15 of the member states The EU today equals and even exceeds the U S on many key indicators of performance In the process two similar but nonetheless divergent models of social and economic life stand in contrast with each other The U S is more committed to capitalism and does little to dilute its harsh edges while the nations of Europe support wider social safety nets and more active regulation of commercial activity to mute the crueler aspects of the free market Until recently the economic dynamism of the U S called into question whether the so called European social model was sustainable in an era of globalization The EU was slipping in competitiveness and was being challenged by new global powerhouses like China and India Although the U S economy has slowed there is little indication that European countries are capable of leveraging the situation to their advantage

Exploring the problems that Canada's conflicting levels of jurisdiction pose for the creation of environmental justice policy analyzing clashes between Indigenous and scientific knowledge and documenting the experiences of Aamjiwnaang residents as they navigate their toxic environment this book argues that social and political changes require an experiential and transformative sensing policy approach one that takes the voices of Indigenous citizens seriously Islamic Ecumene David S. demonstrates in vivid detail how China's environmental bureaucrats deal with intense public scrutiny over pollution when they lack the authority to actually improve the physical environment. They assuage public outrage by appearing responsive, benevolent, and humble. But performative governance is hard work. Environmental bureaucrats paradoxically work themselves to exhaustion even when they cannot effectively implement environmental policies. Instead of achieving performance legitimacy by delivering material improvements, the state can shape public opinion through the theatrical performance of goodwill and sincere effort. The Performative State also explains when performative governance fails at impressing its audience and when governance becomes less performative and more substantive. Ding focuses on Chinese evidence, but her theory travels: comparisons with Vietnam and the United States show that all states, democratic and authoritarian alike, engage in performative governance.
