Geologic Life Kathryn Yusoff,2024-03-18 Kathryn Yusoff examines the history of geology as a discipline to theorize how race and racialization emerged from Western production of geologic knowledge *The Earth Through Time* Harold L. Levin,2009-10-05 This best selling historical geology text provides geologists with an excellent balance of basic geology and paleontology The ninth edition presents rich authoritative coverage of the history of the Earth offering the most comprehensive history in the discipline today It maintains its strong approach to stratigraphy and paleontology that other texts have lost The text s paleogeographic maps are excellent in detail and are a vital component in understanding the earth s history Stunning artwork brings the ancient world to life Geology of National Parks boxes encourage them to visit these parks to appreciate their geological significance Geologists will also appreciate the questions about past geologic events and the processes used in finding answers A Second Genesis Julian Chela-Flores,2009 A Second Genesis enquires why nature is intelligible The fast growth of technology and deeper understanding of the humanities have provided significant clues Answering the question why nature can be understood requires an introduction to the new science of astrobiology and the exploration of the Solar System A careful discussion of a OC second GenesisOCO is presented namely our present awareness that life may have emerged on other worlds Writing this volume has been motivated by the need to encourage a constructive dialogue between science and faith Such an objective for a new book is timely since science is inserted with well defined frontiers in the context of human culture Similarly the frontiers of faith do not require religion to justify itself in scientific terms avoiding current unnecessary controversies *The Comprehensive Guide to Science and Faith* William A. Dembski,Casey Luskin,Joseph M. Holden,2021-10-05 Science and Faith Can and Do Support Each Other Science and Christianity are often presented as opposites when in fact the order of the universe and the complexity of life powerfully testify to intelligent design With this comprehensive resource that includes the latest research you ll witness how the findings of scientists provide compelling reasons to acknowledge the mind and presence of a creator Featuring more than 45 entries by top caliber experts you ll better understand how scientific concepts like intelligent design are supported by evidence the scientific findings that support the history and accounts found in the Bible the biases that lead to scientific information being presented as a challenge rather than a complement to Christianity Whether you re looking for answers to your own questions or seeking to explain the case for intelligent design to others The Comprehensive Guide to Science and Faith is an invaluable apologetic tool that will help you explore and analyze the relevant facts research and theories in light of biblical truth Vision and Voyages for Planetary Science in the Decade 2013-2022 National Research Council,Division on Engineering and Physical Sciences,Space Studies Board,Committee on the Planetary Science Decadal Survey,2012-01-30

In recent years planetary science has seen a tremendous growth in new knowledge Deposits of water ice exist at the Moon's poles Discoveries on the surface of Mars point to an early warm wet climate and perhaps conditions under which life could have emerged Liquid methane rain falls on Saturn's moon Titan creating rivers lakes and geologic landscapes with uncanny resemblances to Earth's Vision and Voyages for Planetary Science in the Decade 2013-2022 surveys the current state of knowledge of the solar system and recommends a suite of planetary science flagship missions for the decade 2013-2022 that could provide a steady stream of important new discoveries about the solar system Research priorities defined in the report were selected through a rigorous review that included input from five expert panels NASA's highest priority large mission should be the Mars Astrobiology Explorer-Cacher (MAX-C) a mission to Mars that could help determine whether the planet ever supported life and could also help answer questions about its geologic and climatic history Other projects should include a mission to Jupiter's icy moon Europa and its subsurface ocean and the Uranus Orbiter and Probe mission to investigate that planet's interior structure atmosphere and composition For medium size missions Vision and Voyages for Planetary Science in the Decade 2013-2022 recommends that NASA select two new missions to be included in its New Frontiers program which explores the solar system with frequent mid-size spacecraft missions If NASA cannot stay within budget for any of these proposed flagship projects it should focus on smaller less expensive missions first Vision and Voyages for Planetary Science in the Decade 2013-2022 suggests that the National Science Foundation expand its funding for existing laboratories and establish new facilities as needed It also recommends that the program enlist the participation of international partners This report is a vital resource for government agencies supporting space science the planetary science community and the public
