The Horizontal Effect of Fundamental Rights in the European Union Eleni Frantziou, 2019-01-31 This book analyses the horizontal effect of fundamental rights in the European Union from a constitutional perspective It advances two main arguments First it argues that the horizontal effect of fundamental rights i.e their application to disputes between private parties cannot be usefully discussed based on the existing EU horizontality doctrine which associates horizontality

with the exercise of horizontal direct effect only That doctrine is characterised by a series of overly technical rules as to how the latter may be produced and has a case specific nature that lacks overall constitutional coherence Secondly the book argues that a substantive theory of horizontality is required in EU law and sketches its main parameters In the fundamental rights context horizontal effect has organisational implications for society which go beyond specific intersubjective disputes It is argued that its determination requires an explicit recognition of the public character of certain private platforms of will formation e g the workplace and a discussion of the role of fundamental rights therein At the same time a constitutionally adequate model of horizontality involves an acknowledgment of the supranational character of EU adjudication the determination of horizontal applicability of a fundamental right within a type of private authority relationship falls upon the Court of Justice but the precise manifestation of horizontal effect e g direct indirect or state mediated effect rests with national courts

Locative Media Rowan Wilken, Gerard Goggin, 2014-08-07 Not only is locative media one of the fastest growing areas in digital technology but questions of location and location awareness are increasingly central to our contemporary engagements with online and mobile media and indeed media and culture generally This volume is a comprehensive account of the various location based technologies services applications and cultures as media with an aim to identify inventory explore and critique their cultural economic political social and policy dimensions internationally In particular the collection is organized around the perception that the growth of locative media gives rise to a number of crucial questions concerning the areas of culture economy and policy

The Ecosocial Transition of Societies Aila-Leena Matthies, Kati Närhi, 2016-10-04 This groundbreaking book both explains and expands the growing debate on ecological environmental social work at the global level In order to achieve this the book strengthens the environmental paradigm in social work and social policy by undertaking further research on theoretical and conceptual clarification as well as distinct reflections on its practical directions Divided into five parts concepts the impact of environmental crises sustainable communities and lifestyles food politics and the profession in transition this work s main objective is to place ecological social work as a part of the more comprehensive and interdisciplinary eco social transition of societies towards sustainability balancing economic and social development with the limited resources of the natural environment By focussing on these five core concepts it shows how social work and social policy contribute to this transition through having a research based approach and orientation on solutions rather than problem analysis The book will be of interest to scholars from a broad range of disciplines including those in social work and social policy sustainability economics agriculture and environmental studies

such as the World Bank and the OECD warn that the economic changes driven by an aging society negatively affects the sustainability of pension systems This book analyzes different global public pension systems to offer policies methods and tools for sustainable public pensions Real case studies from France Sweden Latin America Algeria USA and Mexico are featured

Predisposed John R. Hibbing, Kevin B. Smith, John R. Alford, 2013-09-23 Buried in many people and operating largely outside the realm of conscious thought are forces inclining us toward liberal or conservative political convictions Our biology predisposes us to see and understand the world in different ways not always reason and the careful consideration of facts These predispositions are in turn responsible for a significant portion of the political and ideological conflict that marks human history With verve and wit renowned social scientists John Hibbing Kevin Smith and John Alford pioneers in the field of biopolitics present overwhelming evidence that people differ politically not just because they grew up in different cultures or were presented with different information Despite the oft heard longing for consensus unity and peace the universal rift between conservatives and liberals endures because people have diverse psychological physiological and genetic traits These biological differences influence much of what makes people who they are including their orientations to politics Political disputes typically spring from the assumption that those who do not agree with us are shallow misguided uninformed and ignorant Predisposed suggests instead that political opponents simply experience process and respond to the world differently It follows then that the key to getting along politically is not the ability of one side to persuade the other side to see the error of its ways but rather the ability of each side to see that the other is different not just politically but physically Predisposed will change the way you think about politics and partisan conflict As a bonus the book includes a Left Right 20 Questions game to test whether your predispositions lean liberal or conservative

The Deceased-focused Approach to Grief Frank E. Eyetsemitan, 2022-04-22 Conventional grief models focus on the bereaved including actions that they need to take to get back to normalcy following the death of a loved one This book suggests that it might be helpful in the grieving process to focus on the deceased instead Research points to the benefits of altruistic acts and thoughts including improvements in mood Altruistic acts and thoughts also could be extended to the deceased who in death has experienced a loss as well By taking on the perspective of and being empathic toward the deceased a response shift occurs that could result in mood improvement and happiness in the bereaved The book provides guidelines for this alternative grief model in the death of a child of a teenager of a spouse partner and of a sibling and in multiple deaths and in persistent grief experience among others Based on motivational principles a workbook is also provided for monitoring progress in coping with bereavement Comprehension questions and additional readings are provided in each chapter to help the reader further explore the topic at hand This book would be useful in a course on death dying and bereavement to healthcare practitioners bereavement counsellors and to scholars in death dying and bereavement across different fields including psychology sociology social work public health and religion Most grief models focus on the bereaved including actions the survivor needs to take to get back to normalcy after a

loss However in the grieving process it might be helpful if attention is shifted to the deceased instead The bereaved by doing things she or he perceives as pleasing to the deceased might receive healing and satisfaction in return Lisa Farino 2010 notes that there is no shortage of research pointing to the beneficial effects of focusing on others In a study by Carolyn Schwartz and Rabbi Meir Sendor 1999 lay people with a chronic disease were trained to provide compassionate unconditional regard to others who had the same illness The results showed that the providers of care and compassion reported better quality of life than the recipients of care and compassion even though both givers and receivers had the same disease The givers showed profound improvements in confidence self awareness self esteem depression and in role functioning The researchers emphasized the beneficial importance of response shift the shifting of internal standards values and concept definition of health and well being in dealing with one's own adversity Farino 2010 notes that this research is profound because in western culture the belief is that feeling happy tends to be getting something for yourself There are biological origins to the notion that it's better to give than to receive Using the functional magnetic resonance imaging fMRI researchers were able to demonstrate a connection between brain activity and giving People who gave voluntarily and also for a good cause experienced more activation of the part of brain that controls for pleasure and happiness e.g Harbaugh Mayr Burghart 2007 Studies show that about 7% of the US population experience complicated or prolonged grief disorder e.g Kersting et al 2011 This is persistent grief that does not go away and many parents tend to experience this after the loss of a child In their study Catherine Rogers and colleagues 2008 found bereaved parents reporting more depressive symptoms poorer well being and more health problems after a child's loss almost 20 years later Survivors usually show concern about how their deceased loved ones felt prior to death and if happy or not in the afterlife e.g Eyetsemitan Eggleston 2002 A study reported respondents used emotion discrete terms such as sad happy or angry to describe the faces of deceased persons The researchers suggested that the perceived emotional state of a deceased loved one could impact on the survivor's mourning trajectory e.g Eyetsemitan Eggleston 2002 The bereavement model of placing focus on the deceased instead provides an alternative to existing bereavement models in helping the survivor to cope with a loss

Equality and

Non-discrimination Jane F. Adolphe, Robert L. Fastiggi, Michael A. Vacca, 2019-04-11 This volume explores ways of understanding equality and non discrimination Drawing on the timeless logic of realist philosophy Catholic morality and Catholic social teaching the authors seek to provide intellectual clarity on many controversial questions The contributors are lawyers philosophers and theologians who offer rich insights into the modern crisis of social thought on equality They examine various global assaults on human life marriage the family and the natural dignity of masculinity and femininity They seek to uphold the essential foundations of reality for the attainment of the common good The contributors attempt to move beyond a positivist mentality in order to evaluate the first principles of the natural law in which all human law is grounded The various chapters evaluate developments and application of theories of equality and non discrimination in the history of

Western thought in modern European practice in contemporary inter American practice in the Asian setting in the Middle East and North Africa and in the Catholic canon law tradition The authors strive to restore a universally valid conception of equality and non discrimination as understood within the Catholic tradition

Exploring Process Management as a Means for Greening Road Freight Transport Priscilla Navarro,2019-11-18 Research has proven that we need to reduce our environmental impact Sweden has set a goal to become fossil free by 2045 The increasing amount of transport and the need to reduce its environmental effects has put pressure on the companies of the

road freight transport sector Therefore this business sector needs research actions to find tools that will assist in the greening of its services and operations My research is a contribution to these efforts from a managerial point of view Process management is a methodology taken from Total Quality Management TQM that has been used in several business sectors to improve business performance Its process orientation and focus on customers allow companies to identify and satisfy the current and latent needs of their customers Until now TQM has targeted customer needs However it is experiencing a shift towards incorporating societal needs into the equation Environmental sustainability is becoming a societal requirement for companies in all sectors Hence the purpose of my research is to explore the possibilities of using process management to support the greening of small and medium sized companies within the road freight transport sector The frame of reference for my study is based on three well established domains in academia and their intersections These domains are process management road freight transport and environmental sustainability I have used qualitative methods for my research Specifically I performed a case study at two medium sized Swedish companies within the road freight transport business sector The data collection methods involved document studies observations and interviews at each case company The case study was performed using an action research approach which involved setting up meetings seminars and workshops with each case company Additionally joint workshops were performed which allowed me to observe and obtain results from the interactions between the companies The analysis is presented for each case separately and then for their interactions The results are compared with the existing literature from the three domains I based my research on three research questions The first was intended to identify the principles and tools within process management that may be applied to road freight transport companies interested in implementing this methodology to enhance their environmental sustainability I concluded that these principles were present in the companies and are needed for the implementation of process management The tools included in this methodology can be associated with environmental initiatives performed by the companies in support of their greening The second research question refers to the benefits and challenges that companies in this business sector may face when implementing process management methodology I conclude that most of the expected benefits of process management were confirmed Additionally a new benefit was observed reducing the environmental effect of their services can interest current customers and attract new customers to road freight transport companies The challenges identified during the case study include resistance to change lack of knowledge and resource allocation limitations I also confirmed that a stepwise implementation of process management increases the likelihood of the success of the methodology Hence underdeveloped management systems are also a challenge when this methodology is used in freight transport companies The third and final research question involves the adaptations required for process management to enhance environmental sustainability in companies in this business sector I refer to each of the challenges found and suggest certain requirements for the companies to apply this methodology Clear communication from top management the training of employees and the involvement of all

employees are some of these requirements Moreover to incorporate the environmental aspects clearly I suggest environmental efforts for each step in the implementation of process management By including these efforts in the process maturity model I conclude that road freight transport companies could use process management as a means of enhancing environmental sustainability Forskning har visat att vi måste minska vår miljöbelastning Sverige har som mål att vara fossilfritt 2045 Den ökade mängden transporter och behovet av att sänka miljöbelastningen har en direkt påverkan på godstransportsektorn Därför behövs forskningsföretag riktade mot dessa företag att hitta verktyg som hjälper till att minska miljöbelastningen av dess verksamhet och tjänster Min forskning är ett bidrag till dessa ansträngningar ur ett ledningsperspektiv Processledning är en metodik inom Total Quality Management TQM som har använts i flera branscher för att förbättra affärsresultat Processorientering och fokus på kunderna gör att företaget kan identifiera och tillfredsställa aktuella och latenta behov från deras kunder Fram till idag så har TQM siktat in sig på kundbehov men just nu pågår en flyttning inom TQM mot att även inkludera samhällsbehov i ekvationen Miljömått och hållbarhet kommer att bli ett samhällslikt krav för företag inom alla branscher Därför är syftet med min forskning att utforska möjligheterna av att använda processledning som ett verktyg för att minska miljöbelastningen av små och medelstora företag inom godstransportbranschen Min studie baseras på tre valtabellerade områden inom akademien och deras överlapp Områdena är processledning godstransporter och miljömått och hållbarhet Jag har använt kvalitativa metoder för min forskning Specifikt så genomfördes en fallstudie vid två medelstora svenska företag inom godstransportbranschen Datainsamlingsmetoder som användes var dokumentstudier observationer samt intervjuer hos båda företagen Fallstudien genomfördes med en aktionsforskningsapproach Aktionsforskningen genomfördes som åtta seminarier och workshops hos varje företag Dessutom genomfördes gemensamma workshops med företagen vilket gjorde det möjligt att observera och få resultat utifrån samspelet mellan företagen Analysen presenteras för varje företag separat och därefter utifrån deras samspel resultaten jämfördes med existerande litteratur från de tre områdena Min forskning utgår från tre frågeställningar Syftet med den första var att identifiera principerna och verktygen inom processledning som kan appliceras på godstransportföretag som är intresserade av att implementera metodiken för att sänka sin miljömått och hållbarhet Jag drog slutsatsen att principerna från processledning fanns inom företagen och dom behövs för implementeringen av processledningen Verktygen inom den här metodiken kan associeras med miljöinitiativ utifrån företagen och minska deras miljöbelastning Den andra frågeställningen avser fördelarna samt utmaningarna som företag inom det här området möter när de implementerar processledningsmetodiken Min slutsats är att de flesta av de förväntade fördelarna med processledning bekräftas samt att ytterligare en ny fördel upptäcktes En minskad miljöbelastning av deras tjänster kan intressera nuvarande kunder och dra till sig nya De identifierade utmaningarna från fallstudien inkluderar motstånd mot förändring avsaknad av kunskap samt resursbegränsningar Jag bekräftade även att en stegvis implementering av processledning kan möjliggöra att metodiken ska bli framgångsrik Därför är också underutvecklade ledningssystem en utmaning för att kunna använda den här metodiken inom

godstransportf retag Den tredje och sista fr gest llingen ber r de anpassningarna av processledning som kr vs f r att kunna ka milj m ssig h llbarhet hos f retag inom det h r aff rsomr det Jag refererar till var och en av de utmaningar som hittades och f resl r vissa krav f r f retagen att applicera den h r metodiken Tydlig kommunikation ifr n ledningen utbildning av anst llda och involvering av alla medarbetare r n gra av dessa krav Dessutom f r att integrera milj aspekten tydligt s f resl r jag milj arbete f r varje steg av implementeringen av processledning Jag drar slutsatsen att godstransportf retag skulle kunna anv nda processledning som ett s tt att ka milj m ssig h llbarhet
