Stories of Life-Span Development: Darius and His Father

An increasing number of fathers are staying home to care for their children (Bartol & others, 2018; Dettl-Hagenmeyer, Erzinger, & Reichle, 2016). And researchers are finding improved outcomes when fathers are positively engaged with their infants (Alexander & others, 2017; Cabrera & Roggman, 2017; Roopnarine & Yildirim, 2008; Sethna & others, 2018). Consider 17-month-old Darius. On weekdays, Darius' father, a writer, cares for him during the day while his mother works full-time as a landscape architect. Darius' father is doing a great job of caring for him. He keeps Darius nearby while he is writing and spends lots of time talking to him and playing with him. From their interactions, it is clear that they genuinely enjoy each other's company.

Last month, Darius began spending one day a week at a child-care center. His parents selected the center after observing a number of centers and interviewing teachers and center directors. His parents placed him in the center because they wanted him to get some experience with peers and his father to have some time out from caregiving.

Darius' father looks to the future and imagines the Little League games Darius will play in and the many other activities he can enjoy with his son. Remembering how little time his own father spent with him, he is dedicated to making sure that Darius has an involved, nurturing relationship with his father.

How might fathers influence their infants' and children's development?

Bowers, 2021-07-29 Nevada's politics are in large measure the result of its turbulent history and harsh environment Michael W. Bowers's concise volume explains the dynamics of the political formation process which is strikingly unique among the fifty states Even today Nevada is unlike the other states in its politics and culture economically right yet libertarian and home to widespread gaming and a 24/7 lifestyle It has a high percentage of federally owned lands and one of the highest rates of urbanism in the United States yet is often dominated by rural legislators The sixth edition is updated through 2020 and includes the full text of the state constitution with extensive annotations of all amendments to the original 1864 document *Conference Proceedings. Congress. House. Committee on Appropriations. Subcommittee on Department of Defense, 1988 **Teaching and Learning at a Distance** Michael Simonson, Sharon Smaldino, Susan M. Zvacek, 2014-10-01 Teaching and Learning at a Distance is written for introductory distance education courses for preservice or in-service teachers and for training programs that discuss teaching distant learners or managing distance education systems This text provides readers with the basic information needed to be knowledgeable distance educators and leaders of distance education programs The teacher or trainer who uses this book will be able to distinguish between appropriate uses of distance education In this text we take the following themes The first theme is the definition of distance education Before we started writing the first edition of Teaching and Learning at a Distance we carefully reviewed the literature to determine the definition that would be at the foundation of our writing This definition is based on the work of Desmond Keegan but is unique to this book This definition of distance education has been adopted by the Association for Educational Communications and Technology and by the Encyclopedia Britannica The second

theme of the book was the importance of research to the development of the contents of the book The best practices presented in Teaching and Learning at a Distance are validated by scientific evidence Certainly there are rules of thumb but we have always attempted to only include recommendations that can be supported by research The third theme of Teaching and Learning at a distance is derived from Richard Clark s famous quote published in the Review of Educational Research that states that media are mere vehicles that do not directly influence achievement Clark s controversial work is discussed in the book but is also fundamental to the book s advocacy for distance education in other words we authors did not make the claim that education delivered at a distance was inherently better than other ways people learn Distance delivered instruction is not a magical approach that makes learners achieve more The fourth theme of the book is equivalency theory Here we presented the concept that instruction should be provided to learners that is equivalent rather than identical to what might be delivered in a traditional environment Equivalency theory helps the instructional designer approach the development of instruction for each learner without attempting to duplicate what happens in a face to face classroom The final theme for Teaching and Learning at a Distance is the idea that the book should be comprehensive that it should cover as much of the various ways instruction is made available to distant learners as is possible It should be a single source of information about the field
