*Merleau-Ponty's Developmental Ontology* David Morris,2018-10-15 Winner of the 2020 Edward Goodwin Ballard Prize in Phenomenology Merleau Ponty s *Developmental Ontology* shows how the philosophy of Maurice Merleau Ponty from its very beginnings seeks to find sense or meaning within nature and how this quest calls for and develops into a radically new ontology David Morris first gives an illuminating analysis of sense showing how it requires understanding nature as engendering new norms He then presents innovative studies of Merleau Ponty s *The Structure of Behavior* and *Phenomenology of Perception* revealing how these early works are oriented by the problem of sense and already lead to difficulties about nature temporality and ontology that preoccupy Merleau Ponty s later work Morris shows how resolving these difficulties requires seeking sense through its appearance in nature prior to experience ultimately leading to radically new concepts of nature time and philosophy Merleau Ponty s *Developmental Ontology* makes key issues in Merleau Ponty s philosophy clear and accessible to a broad audience while also advancing original philosophical conclusions

**Minimal Selfhood and the Origins of Consciousness** Rupert Glasgow,2018-07-10 In *Minimal Selfhood and the Origins of Consciousness* R D V Glasgow seeks to ground the logical roots of consciousness in what he has previously called the minimal self The idea is that elementary forms of consciousness are logically dependent not as is commonly assumed on ownership of an anatomical brain or nervous system but on the intrinsic reflexivity that defines minimal selfhood The aim of the book is to trace the logical pathway by which minimal selfhood gives rise to the possible appearance of consciousness It is argued that in specific circumstances it thus makes sense to ascribe elementary consciousness to certain predatory single celled organisms such as amoebae and dinoflagellates as well as to

some of the simpler animals Such an argument involves establishing exactly what those specific circumstances are and determining how elementary consciousness differs in nature and scope from its more complex manifestations

**Applied Geography: The Formulation Of A New Ecological Science** John J. Moran,2019-02-07 Dedicated since ancient times to the study of interactions between Life processes and the environmental influences of our Earth world home and recognized by Charles Darwin as the Queen of

Sciences Geography has provided an epistemological store of knowledge relating to past human experiences whether propitious or doleful in nature This pool of wisdom recorded in the Language of Geographical connectivity could be of great potential value in guiding decisions and the formulation of remedial strategies required to redress the pernicious effects of human cupidity and reckless exploitation of human and physical resources But the discipline of Geography has become an isolated and fractured science at a time when it could be called upon to counter the destructive effects of systemic problems such as climate change The world is at a crossroads reeling in shock from the traumatic effects of war clouded with anxiety about the future

*The Disintegration of the Worlds Financial System* Rolf A. F. Witzsche,2003 **The Minimal Self** Rupert Glasgow,2017-06-13 Self is a term that is much used but often poorly understood or over hastily dismissed In *The Minimal Self* R D V Glasgow seeks to unearth the underlying nature of selfhood Glasgow s approach is based upon the notion of intrinsic reflexivity which manifests itself in three fundamental forms self maintenance self reproduction and self containment Through a conceptual analysis of selfhood Glasgow aims to ascertain what distinguishes full forms of minimal selfhood from entities such as genes and viruses that are merely selfish or self like The idea is to establish the logical prerequisites for the transition from a world bereft of selfhood to one populated by selves like us Minimal selfhood thus provides a bridge linking philosophy biology and other disciplines that have previously failed to coincide in their understanding of what a self is
