Resources in Education, 2000-10 *International Encyclopedia of Information and Library Science* John Feather, Paul Sturges, 2003-09-02. This eagerly awaited new edition has been fully revised and updated to take full account of the many and radical changes which have taken place since the Encyclopedia was originally conceived. *International Cataloguing and Bibliographic Control*, 1998 *Union Catalogues of Serials, Guidelines for Creation and Maintenance, with Recommended Standards for Bibliographic and Holdings Control* Jean Whiffin, 1983. Union Catalogue of Serials presents the practical optimum for the design, compilation and maintenance of world wide standardized union cataloging activities. Particularly valuable for networks, bibliographic agencies and institutions planning the establishment of a new or the improvement of an existing union catalogue of serials. Although the need for common standards in union cataloging has always been recognized, no single set of rules with universal applicability existed until the publication of this exciting volume. These guidelines introduce codes of good practice and recommended standards for bibliographic and holdings control to be used in the creation and maintenance of union catalogues of serials, bearing in mind the requirements for international exchange. All countries can benefit from the universal relevance provided in these guidelines for improving physical and bibliographic access to serials resources and in making the most of opportunities provided by computerized production. This practical volume gives useful guidance on the components in the preparation and production of a union catalogue of serials, the administrative machinery required to bring each project to fruition and the interface with other serials control systems and other information networks. **Information Pathways** Crystal Fulton, 2010-03-23.
