of European Christians in the later middle ages The clergy of this period initiated new approaches to the role of priests bishops and popes and developed an ambitious project to instruct the laity For lay people the practices of parish religion were central but many sought additional ways to enrich their lives as Christians Impulses towards reform and renewal periodically swept across Europe led by charismatic preachers and supported by secular rulers This book provides accessible accounts of these complex historical processes and entices the reader towards further enquiry

**The Monstrous New Art** Anna Zayaruznaya, 2015-04-02 Late medieval motet texts are brimming with chimeras centaurs and other strange creatures In *The Monstrous New Art* Anna Zayaruznaya explores the musical ramifications of this menagerie in the works of composers Guillaume de Machaut Philippe de Vitry and their contemporaries Aligning the larger forms of motets with the broad sacred and secular themes of their texts Zayaruznaya shows how monstrous or hybrid exempla are musically sculpted by rhythmic and textural means These divisive musical procedures point to the contradictory aspects not only of explicitly monstrous bodies but of such apparently unified entities as the body politic the courtly lady and the Holy Trinity Zayaruznaya casts a new light on medieval modes of musical representation with profound implications for broader disciplinary narratives about the history of text music relations the emergence of musical unity and the ontology of the musical work

**Upper-Voice Structures and Compositional Process in the Ars Nova Motet** Anna Zayaruznaya, 2018-05-11 In the motets of Philippe de Vitry Guillaume de Machaut and their contemporaries tenors have often been characterized as the primary shaping forces prior in conception as well as in construction to the upper voices Tenors are shaped by the interaction of *talea* and *color* medieval terms now used to refer to the independent repetition of rhythms and pitches respectively The presence in the upper voices of the periodically repeating rhythmic patterns often referred to as *isorhythm* has been characterized as an amplification of tenor structure But a fresh look at the medieval treatises suggests a revised analytical vocabulary for many fourteenth and fifteenth century writers both *color* and *talea* involved rhythmic repetition the latter in the upper voices specifically And attention to upper voice *taleae* independently of tenor structures brings renewed emphasis to the significant portion of the repertory in which upper voices evince formal schemes that differ from those in the tenors These structures in turn suggest a revision of the presumed compositional process for motets implying that in some cases upper voice text and forms may have preceded the selection and organization of tenors Such revisions have implications for hermeneutic endeavors since not only the forms of motet voices but the meanings of their texts change depending on whether analysis proceeds from the tenor up or from the top down Where the presumed compositional and structural primacy afforded to tenors has encouraged a strand of interpretation that reads the upper voice poetry as conforming to and amplifying the tenor text snippets and their liturgical contexts a bottom down view casts tenors in a supporting role and reveals the poetic impulse of the upper voices as the organizing principle of motets

**Essays on Renaissance Music in Honour of David Fallows** Fabrice Fitch, Jacobijn Kiel, 2011 New articles on du Fay and Desprez on sacred and secular music and reception

history form a fitting tribute to one of the field's foremost scholars. This volume celebrates the work of David Fallows, one of the most influential scholars in the field of medieval and Renaissance music. It draws together articles by scholars from around the world focusing on key topics to which Fallows has contributed significantly: the life and works of Guillaume Du Fay and of Josquin Desprez; archival studies and biography; sacred and secular music of the late mediaeval and Renaissance period; and reception history. Studies include major archival discoveries concerning the identity of the composer Fremin Caron; a reconsideration of the authorship of works within the Josquin canon, notably *Mille regretz* and *Absalon fili mi*; a fresh look at key works from Du Fay's youth and early maturity; accounts of newly discovered sources and works; and an appraisal of David Fallows' contribution to the early music performance movement by Christopher Page, former director of Gothic Voices. The collection also includes two newly published compositions dedicated to the honoree. Fabrice Fitch teaches at the Royal Northern College of Music, Jacobijn Kiel is an independent scholar. **Vernacular Aesthetics in the Later Middle Ages** Katharine W. Jager, 2019-07-03. *Vernacular Aesthetics in the Later Middle Ages* explores the formal composition, public performance, and popular reception of vernacular poetry, music, and prose within late medieval French and English cultures. This collection of essays considers the extra-literary and extra-textual methods by which vernacular forms and genres were obtained and examines the roles that performance and orality play in the reception and dissemination of those genres, arguing that late medieval vernacular forms can be used to delineate the interests and perspectives of the subaltern. Via an interdisciplinary approach, contributors use theories of multimodality, translation, manuscript studies, sound studies, gender studies, and activist New Formalism to address how and for whom popular vernacular medieval forms were made. *Explorations in Music and Esotericism* Marjorie Roth, Leonard George, 2023. Scholars explore from many fresh angles the interweavings of two of the richest strands of human culture: music and esotericism, with examples from the medieval period to the modern age. Music and esotericism are two responses to the intuition that the world holds hidden order, beauty, and power. Those who compose, perform, and listen to music have often noted that music can be a bridge between sensory and transcendent realms. Such renowned writers as Boethius expanded the definition of music to encompass not only sounded music but also the harmonic fabric of human and cosmic life. Those who engage in pursuits called esoteric, from ancient astrology, magic, and alchemy to recent and more novel forms of spirituality, have also remarked on the relevance of music to their quests. Esotericists have composed music in order to convey esoteric

meaning performed music to create esoteric influences and listened to music to raise their esoteric awareness The academic study of esotericism is a young field and few researchers have probed the rich interface between the musical and esoteric domains In *Explorations in Music and Esotericism* scholars from numerous fields introduce the history of esotericism and current debates about its definition and extent The book's sixteen chapters present rich instances of connections between music and esotericism organized with reference to four aspects of esotericism as a form of thought as the keeping and revealing of secrets as an identity and as a signifier Edited by Marjorie Roth and Leonard George Contributors Elizabeth Abbate Malachai Komanoff Bandy Adam Bregman Charles E Brewer Benjamin Dobbs Anna Gawboy Pasquale Giaquinto Adam Knight Gilbert Joscelyn Godwin Virginia Christy Lamothe Andrew Owen Christopher Scheer Codee Ann Spinner Woodrow Steinken and Daphne Tan

*A Theory of Virtual Agency for Western Art Music* Robert S. Hatten, 2018-09-06 In his third volume on musical expressive meaning Robert S Hatten examines virtual agency in music from the perspectives of movement gesture embodiment topics tropes emotion narrativity and performance Distinguished from the actual agency of composers and performers whose intentional actions either create music as notated or manifest music as significant sound virtual agency is inferred from the implied actions of those sounds as they move and reveal tendencies within music stylistic contexts From our most basic attributions of sources for perceived energies in music to the highest realm of our engagement with musical subjectivity Hatten explains how virtual agents arose as distinct from actual ones how unspecified actants can take on characteristics of virtual human agents and how virtual agents assume various actorial roles Along the way Hatten demonstrates some of the musical means by which composers and performers from different historical eras have staged and projected various levels of virtual agency engaging listeners imaginatively and interactively within the expressive realms of their virtual and fictional musical worlds

*The Oxford Handbook of Early Modern European History, 1350-1750* Hamish M. Scott, 2015 This Handbook re-examines the concept of early modern history in a European and global context. The term early modern has been familiar especially in Anglophone scholarship for four decades and is securely established in teaching, research and scholarly publishing. More recently, however, the unity implied in the notion has fragmented while the usefulness and even the validity of the term and the historical periodisation which it incorporates have been questioned. The Oxford Handbook of Early Modern European History 1350-1750 provides an account of the development of the subject during the past half century but primarily offers an integrated and comprehensive survey of present knowledge together with some suggestions as to how the field is developing. It aims both to interrogate the notion of early modernity itself and to survey early modern Europe as an established field of study. The overriding aim will be to establish that early modern is not simply a chronological label but possesses a substantive integrity. Volume II is devoted to Cultures and Power, opening with chapters on philosophy, science, art and architecture, music and the Enlightenment. Subsequent sections examine Europe beyond Europe with the transformation of contact with other continents during the first global age and military and political developments, notably the expansion of state power.

**The Cambridge History of Musical Performance** Colin Lawson, Robin Stowell, 2012-02-16 The intricacies and challenges of musical performance have recently attracted the attention of writers and scholars to a greater extent than ever before. Research into the performer's experience has begun to explore such areas as practice techniques, performance anxiety and memorisation as well as many other professional issues. Historical performance practice has been the subject of lively debate way beyond academic circles, mirroring its high profile in the recording studio and the concert hall. Reflecting the strong ongoing interest in the role of performers and performance, this History brings together research from leading scholars and historians and importantly features contributions from accomplished performers whose practical experiences give the volume a unique vitality. Moving the focus away from the composers and onto the musicians responsible for bringing the music to life, this History presents a fresh, integrated and innovative perspective on performance history and practice from the earliest times to today.
