

Invertebrate Classification Challenge

I designed this activity to allow students to practice invertebrate classification using the signatures described to us without first studying them (which I'll do in the Period of Echinoderm).

I printed the pages for the classification both as 8 1/2 x 11 each page, taped the two pages together, and laminated them. I also made several copies of the signature cards, which were printed on card stock and inserted in Ziploc bags.

For the activity, students work in teams to classify the signatures and then compare their guesses to the key answer sheets. I also provide the "What are???" questions for students to fill in and suggest to them some projects as they study subsets of classes. I also give them a quiz or discussion which tests they know and which ones they don't.

Challenge: I also challenge the students to see that others in an article team can complete it in the same time. Many of my students are able to correctly identify all the signatures in 10 seconds or less. Trainers must have perfect match time there. The class is surprisingly fast shuffling the cards and placing them in one pile at the end of a round.
