[Water-Energy-Food Nexus](#) P. Abdul Salam, Sangam Shrestha, Vishnu Prasad Pandey, Anil Kumar Anal, 2017-08-21. Water, energy and food are key resources to sustain life and are the fundamental to national, regional and global economies. These three resources are interlinked in multiple ways and the term nexus captures the interconnections. The nexus has been discussed, debated, researched and advocated widely but the focus is often on the pairings of water/energy or water/food or energy/food. To really benefit from the nexus approach in terms of resource use efficiency it is essential to understand, operationalize and practice the nexus of all three resources. As demand for these resources increases worldwide, using them sustainably is a critical concern for scientists and citizens, governments and policy makers. Volume highlights include Contributions to the global debate on water/energy/food nexus, Examples of the nexus approach in practice from different regions of the world, Perspectives on the future of the nexus agenda, Water/Energy

Food Nexus Theories and Practices is a valuable resource for students research scholars and professionals in academic institutions with strong interests in interdisciplinary research involving geography earth science environmental science environmental management sustainability science international development and ecological economics The volume will also be useful for professionals practitioners and consultants in NGOs government and international agencies Read an interview with the editors to find out more <https://eos.org/editors-vox-working-towards-a-sustainable-future>
