Number and Operations: Whole Numbers

Counting and the Number System

Throughout first grade, students work on developing strategies for accurately counting a group of up to 50 objects. They have repeated practice with the counting sequence, both forwards and backward, and with counting and keeping track of sets of objects. They also connect the number names with the written numbers and the quantities that they represent.

Five

As students are developing accurate counting strategies they are also building an understanding of how the numbers in the counting sequence are related—each number is one more (or one less) than the number before (or after) it. As students build this understanding, they compare and order quantities and develop a sense of the relative size of numbers and the quantities they represent.
