**British Entrepreneurship in Poland** Dr Sarah Dietz, 2015-07-28 Drawing upon an impressive range of international sources this book explores the late nineteenth century partnership between Bradford worsted manufacturers the Briggs brothers and the German merchant Ernst Posselt and their investment in a factory and workers community at Marki near Warsaw in Poland Against a backdrop of political instability and social upheaval which dramatically impacted on business after 1905 and particularly during the interwar period of Poland s Second Republic Sarah Dietz examines the fortunes of an extraordinary enterprise which has been little researched in Poland and is largely unknown to British scholars **The Nationality of Corporate Investors under International Investment Law** Anil Yilmaz Vastardis, 2020-10-01 This

monograph offers a detailed and distinctive analysis of corporate nationality under international investment law covering the ICSID Convention and the investment treaty framework. It takes the reader back to the basics threading through the concepts of jurisdiction, nationality and corporate personality to give a clear context to the discussion of corporate nationality under international investment law at a time when international investment is dominated by multinational business enterprises operating in a globalised economy. The book examines different understandings of corporate personality and nationality under a selection of jurisdictions and public international law. It also offers an in-depth analysis of approaches found in ICSID arbitral awards and in investment treaty practice, distilling the problematic areas and discussing the impacts of the areas of concern. It evaluates the techniques developed to address problems and puts forward suggestions for effective and balanced solutions to the questions of corporate nationality and personal scope of investment protection.

Understanding Investments Nikiforos T. Laopodis, 2020-06-03. This revised and fully expanded edition of *Understanding Investments* continues to incorporate the elements of traditional textbooks on investments but goes further in that the material is presented from an intuitive practical point of view and the supplementary material included in each chapter lends itself to both class discussion and further reading by students. It provides the essential tools to navigate complex global financial markets and instruments including relevant and classic academic research and market perspectives. The author has developed a number of key innovative features. One unique feature is its economic angle whereby each chapter includes a section dedicated to the economic analysis of that chapter's material. Additionally, all chapters contain sections on strategies that investors can apply in specific situations and the pros and cons of each are also discussed. The book provides further clarification of some of the concepts discussed in the previous edition, thereby offering a more detailed analysis and discussion with more real-world examples. The author has added new shorter text boxes labeled 'Market Flash' to highlight the use of or changes in current practices in the field, updates on strategies as applied by professionals, provision of useful information for an investor, updates on regulations and anything else that might be relevant in discussing and applying a concept. This second edition also includes new sections on core issues in the field of investments such as alternative investments, disruptive technologies and future trends in investment management. This textbook is intended for undergraduate students majoring or minoring in finance and also for students in economics and related disciplines who wish to take an elective course in finance or investments.

*Recent Advances and Applications in Alternative Investments* Zopounidis, Constantin, Kenourgios, Dimitris, Dotsis, George, 2020-02-07. In recent years there has been a swell of investment opportunities in contemporary asset classes that have gained considerable attention, including cryptocurrencies, hedge funds and private equity. These alternative investments provide the opportunity to enhance the diversification of financial portfolios and harvest risk premiums that traditional assets like stocks and bonds fail to provide. The emergence of these new properties has created the need to further understand the mechanics, risks and returns of alternative investments. Recent

Advances and Applications in Alternative Investments is a pivotal reference source that provides vital research on the emergence and development of complementary asset classes in the field of finance and investment. While highlighting topics such as carbon emission markets, renewable energy, and digital currencies, this publication explores modern investment strategies as well as the latest products and new types of risk. This book is ideally designed for managers, strategists, accountants, financial professionals, economists, brokers, investors, business practitioners, policymakers, researchers, and academicians seeking current research on contemporary developments in investment strategies and alternative assets.

**International Investment Law** Surya P Subedi, 2024-03-21. This book goes beyond stating what the law is and focuses on controversies occurring within this area of the law, an excellent introduction to this complex area of international law for newcomers to the subject. Kate Miles, Australian International Law Journal. The updated edition of this acclaimed book offers a critical overview of the law of foreign investment, incorporating a thorough analysis of the principles and standards of treatment available to foreign investors in international law. It is authoritative and multi-layered, offering an analysis of the key issues and an insightful assessment of recent trends in the case law from both developed and developing country perspectives. A major feature of the book is that it deals with the tension between the law of foreign investment and other competing principles of international law. In doing so, it proposes ways of achieving a balance between these principles and the need to protect the legitimate rights and expectations of foreign investors on the one hand, and the need not to restrict unduly the right of host governments to implement their public policy on the other, including the protection of the environment and human rights and the promotion of social and economic justice within the host country. Many of the pioneering ideas that were advanced in the first edition of this book have been taken up by governments and international organisations in their attempts to reform the investor-State dispute settlement mechanism and strike a balance between different competing principles in developing international investment law. Accordingly, this fifth edition captures the essence of the ongoing multiple reform processes, either planned or envisaged, currently underway.
