Subcommittee on the Departments of Commerce, Justice, and State, the Judiciary, and Related Agencies, 1994 Trames, 2007 **The American Business Encyclopædia and Legal Adviser** John Davis Long, William Powell Wilson, Everett Cephas Bumpus, 1913 *Costa Rica Privatization Programs and Regulations Handbook Volume 1 Strategic Information and Important Regulations* IBP USA, *Portfolios of Real Options* Rainer Brosch, 2008-03-29 Valuing portfolios of options embedded in investment decisions is arguably one of the most important and challenging problems in real options and corporate finance in general Although the problem is common and vitally important in the value creation process of almost any corporation it has not yet been satisfactorily addressed It is key for any corporation facing strategic resource allocation decisions be it a pharmaceutical firm valuing and managing its pipeline of drugs a telecom company having to select a set of technological alternatives a venture capital or private equity firm investing in a portfolio of ventures or any company allocating resources Portfolios of real options typically interact such that the value of the whole differs from the sum of the separate parts Thus one must address and value the particular configuration of options embedded in a specific situation taking into account the configuration of other options already present in the portfolio which in turn depends on the correlation structure among the various underlying assets and the strategic dependencies among the options themselves e.g. mutual exclusivity strategic additivity compoundness complementarity etc In that sense optimal decisions also depend on past option exercise decisions by management and organizational capabilities put in place in the past **The Drivers and Outcomes of Global Health Diplomacy** Maria Berta Eciija, 2023-12-05 This book investigates the Brazilian health cooperation in Mozambique looking at the interests of both actors and different power relations within this initiative It counts with a case study looking at the implementation of Sociedade Mocambicana de Medicamentos a pharmaceutical factory that was implemented in Maputo as a result of the cooperation between the countries *2012-2013 College Admissions Data Sourcebook West Edition*,

McKenna, 2020-10-05 Research for research sake is no longer tenable or affordable to be valuable to society research must have impact This textbook takes the reader on a journey from how the UK Research Excellence Framework assesses impact to real examples of outstanding research impact case studies Along the way Prof Hugh McKenna describes and explains the case for research impact the challenges the link between research impact and evidence informed practice achieving impact through changing policy and engaging with the public how researchers can make their research findings more impactful and how research impact is assessment nationally and internationally It is written in an easily accessible and understandable style with reflective exercises amply distributed throughout its pages and helpful guides helping to engage readers and notably health professionals who are often turned off by the normal heavy research tomes This book makes the complex simple and the wearisome fascinating The short chapters are interesting and authoritative and can be read on a standalone basis allowing readers to dip in and out From his experience in various countries the author has a unique insight into what research impact is how it is assessed and how and where research findings can have the most benefit The stimulus for this book has been the excellent feedback that the author has received from health professionals students and fellow researchers There is always a risk that good knowledge and experience do not transfer well into a good textbook In *Research Impact Guidance on Advancement Achievement and Assessment* nothing has been lost in the transition The book will be of great interest to many health researchers from nursing to midwifery pharmacy medicine or any allied health professional but also to any research manager in all professions who want their research to bring positive change to society culture the economy health and quality of life It will be of particular interest to those who want to understand the difference between research impacts that are weak and those that are outstanding and how such assessments are made

Resilience in the Pacific and the Caribbean Simon Hollis, 2020-10-26 This book critically examines the global diffusion and local reception of resilience through the implementation of Disaster Risk Reduction DRR programmes in Pacific and Caribbean island states Global efforts to strengthen local disaster resilience capacities have become a staple of international development activity in recent decades yet the successful implementation of DRR projects designed to strengthen local resilience remains elusive While there are pockets of success a gap remains between global expectations and local realities Through a critical realist study of global and local worldviews of resilience in the Pacific and Caribbean islands this book argues that the global advocacy of DRR remains inadequate because of a failure to prioritise a person orientated ethics in its conceptualization of disaster resilience This regional comparison provides a valuable lens to understand the underlying social structures that makes resilience possible

and the extent to which local governments communities and persons interpret and modify their behaviour on risk when faced with the global message on resilience This book will be of much interest to students of resilience risk management development studies and area studies Science, Technology, and Global Economic Competitiveness United States.
