Whitehouse, 2010-01-01 The Business of Sustainability is a core resource for policy makers, members of the development

community, entrepreneurs and corporate executives, as well as business and economics students and their professors. It

contains rich analysis of how sustainability is being factored into industries across the globe, with enlightening case studies of

businesses serving as agents of change. Contributing authors provide a groundbreaking body of research-based knowledge.

They explain that the concept of sustainability is being re-framed to be positive about business, instead of being tied to the old

notion of a trade-off between business and society, that is, if business wins, society and the environment must lose, and they

explore how economic development can contribute to building our common future.
