Investigate Fractions Getting Started With Contexts For Learning Mathematics Grades 4 6:

Investigate Fractions Catherine Twomey Fosnot, 2010-10 The rich open investigations we've developed allow children to engage in mathematizing in a variety of ways. We honor children's initial attempts at structuring and modeling their world mathematically while at the same time supporting and challenging them to ensure that important big ideas and strategies are being developed progressively. Catherine Twomey Fosnot Learn how to establish a vibrant collaborative math workshop for students in grades 4 through 6 and how Catherine Fosnot and her colleagues introduce fractions and compare fractional amounts. Through 2 foundational books *Investigating Fractions Decimals and Percents Overview* and *Field Trips and Fund Raisers Introducing Fractions* and eight online video clips Cathy and her colleagues provide the strategies, lesson plans, and tools you'll need to transform your classroom into a community of young mathematicians. In the *Overview* book Cathy provides the professional understandings needed to establish a vibrant math workshop. After chronicling the motivations and ideals that inspire her work, Cathy describes how to help students construct the big ideas, strategies, and models that shape the landscape of learning. Ensuing sections describe the architecture of an investigation and explain how the predictability of this framework fosters independence and collaboration. In addition to describing the management systems that make these investigations rigorous and responsive, Cathy suggests ways to sequence instruction and highlight how units can be used to enhance your existing curriculum. Like the other units in the *Contexts for Learning Mathematics* series, *Field Trips and Fund Raisers Introducing Fractions* provides a two-week sequence of investigations, minilessons, games, and other contexts for learning. The fair sharing of submarine sandwiches on a school field trip provides the context for exploring big ideas related to fractions in this unit. In attempting to settle arguments about the fair distribution of sandwiches, students explore the connection between division and fractions as well as ways to compare fractional amounts. As the unit progresses, students use the double number line as a model and explore equivalent fractions. The nine accompanying video clips include live from the classroom video footage of the unit in action and narrated slide shows that describe the ideals that shape the math workshop and the thinking behind the *Contexts for Learning Mathematics* series. Video clips are free for 6 months upon registration. You must register within 6 months of purchase. Learn more about these resources and the series at www.contextsforlearning.com. This pack is part of Firsthand's *Getting Started* series. Bridging the gap between educational theory and practice, firsthand classroom materials model the carefully crafted techniques and language of master teachers in ways that help teachers refine their practice and reinvent their own teaching. Middleton,Jinfa Cai,Stephen Hwang,2015-05-05 In recent years funding agencies like the Institute of Educational Sciences and the National Science Foundation have increasingly emphasized large scale studies with experimental and quasi experimental designs looking for objective truths Educational researchers have recently begun to use large scale studies to understand what really works from developing interventions to validation studies of the intervention and then to efficacy studies and the final scale up for large implementation of an intervention Moreover modeling student learning

developmentally taking into account cohort factors issues of socioeconomics local political context and the presence or absence of interventions requires the use of large data sets wherein these variables can be sampled adequately and inferences made. Inroads in quantitative methods have been made in the psychometric and sociometric literatures but these methods are not yet common knowledge in the mathematics education community. In fact currently there is no volume devoted to discussion of issues related to large scale studies and to report findings from them. This volume is unique as it directly discusses methodological issue in large scale studies and reports empirical data from large scale studies.
