Investing In Information The Information Management Body Of Knowledge:

Investing in Information Andy Bytheway, 2014-11-28 This book gathers together in a new way established and contemporary thinking about how to get the best out of information technology and information systems investments Working managers who are beset by the complexities of information management in the age of Big Data and the Social Web and students who are trying to make sense of information management in a chaotic world that is more and more driven by the Internet will all benefit from this new treatment of a long standing and problematic domain Importantly the book reveals and clarifies the dependencies that exist between the inner world of information technology and the outer world of people and organisations at work The book differs from other books in its reflective approach It avoids lengthy descriptive and prescriptive dogma Rather it provides tools for thinking about information management and it identifies strategic and tactical options at six levels from the simple consideration of information technology and information systems right through to issues of organisational performance and business strategy At the heart of the matter are two critical and tightly connected issues the ways that we conceive and manage an organisation's processes and the ways that we conceive and manage the information that an organisation needs to sustain those processes The six level framework that achieves this clarity is the Information Management Body of Knowledge familiarly known as the IMBOK This easy to understand and easy to remember framework has been found to be extremely useful in business in government in civil society and in education Throughout the book selected research papers are identified and summarised There are also summary chapters from three different operational perspectives performance and competency assessment using the IMBOK undertaking research into related issues and a review of parallel expert thinking This book stands as a reference point and resource for all those who need to straddle the disparate worlds of information technology and business It provides firm pedagogical foundations for courses dealing with business management in the information age and it provides a sound reference framework for researchers who need to position research projects related to information technology and information systems in a wider context For busy managers who simply wish to identify understand and successfully manage information technology related opportunities it provides an ideal arrangement of ideas and tools that will help them

The Indian Infrastructure Body of Knowledge: Volume 2

Quality Council of India, [Internet of Things for Facility Management](#) Nazly Atta, 2021-01-20 This book proposes strategies for FM services optimization and innovation based on innovative models of IoT application and big data management within FM processes able to support FM stakeholders in orienting and managing big data flows and their sources sensor RFID etc changing FM services demand offer and developing new approaches to FM agreements drawing new supply chains based on network approaches and outlining new profiles of competences for FM stakeholders The book demonstrates that FM stakeholders e.g. Real Estate owners FM providers service suppliers etc increasingly need new support tools for understanding the features of the current offer of innovative ICT solutions in order to become promoters of FM innovation

and it provides them with an analytical procedural framework useful for defining and implementing IoT based FM services
