**Theory and Econometrics of Financial Asset Pricing** Kian Guan Lim, 2022-08-22 This book will provide a firm foundation in the understanding of financial economics applied to asset pricing It carries the real world perspective of how the market works including behavioral biases and also wraps that understanding in the context of a rigorous economics framework of investors risk preferences underlying price dynamics rational choice in the large and market equilibrium other than inexplicable irrational bubbles It concentrates on analyses of stock credit and option pricing Existing highly cited finance models in pricing of these assets are covered in detail and theory is accompanied by rigorous applications of econometrics Econometrics contain elucidations of both the statistical theory as well as the practice of data analyses Linear regression methods and some nonlinear methods are also covered The contribution of this book and at the same time its novelty is in employing materials in probability theory economics optimization econometrics and data analyses together to provide a rigorous and sharp intellect for investment and financial decision making Mistakes are often made with far too often sweeping pragmatism without deeply knowing the underpinnings of how the market economics works This book is written at a level that is both academically rigorous for university courses in investment derivatives risk management as well as not too mathematically deep so that finance and

banking graduate professionals can have a real journey into the frontier financial economics thinking and rigorous data analytical findings      Investment Consultant Diploma - City of London College of Economics - 6 months - 100% online / self-paced City of London College of Economics, Overview This diploma course will teach you everything you need to know to become a successful investment consultant Upon completion you will be able to work for financial companies or freelance Content Financial Instruments Mutual Funds and Other Investment Companies Capital Asset Pricing and Arbitrage Pricing Theory Managing Bond Portfolios Financial Statement Analysis Derivative Markets etc Duration 6 months Assessment The assessment will take place on the basis of one assignment at the end of the course Tell us when you feel ready to take the exam and we ll send you the assignment questions Study material The study material will be provided in separate files by email download link      **Metaheuristic Approaches to Portfolio Optimization** Ray, Jhuma,Mukherjee, Anirban,Dey, Sadhan Kumar,Klepac, Goran,2019-06-22 Control of an impartial balance between risks and returns has become important for investors and having a combination of financial instruments within a portfolio is an advantage Portfolio management has thus become very important for reaching a resolution in high risk investment opportunities and addressing the risk reward tradeoff by maximizing returns and minimizing risks within a given investment period for a variety of assets Metaheuristic Approaches to Portfolio Optimization is an essential reference source that examines the proper selection of financial instruments in a financial portfolio management scenario in terms of metaheuristic approaches It also explores common measures used for the evaluation of risks returns of portfolios in real life situations Featuring research on topics such as closed end funds asset allocation and risk return paradigm this book is ideally designed for investors financial professionals money managers accountants students professionals and researchers      **Sustainable Development, Humanities, and Social Sciences for Society 5.0** Wongmahesak, Kittisak,Wekke, Ismail Suardi,Suanpang, Pannee,2024-10-11 In a world where business is increasingly influenced by rapid technological advancements and shifting societal norms the definition of success has undergone a fundamental transformation Profitability once the sole measure of achievement now shares the stage with sustainability as a critical component of business performance As we transition into Society 5 0 a hyper connected era where technology and human values converge redefining success to include sustainability becomes not just desirable but essential Sustainable Development Humanities and Social Sciences for Society 5 0 explores this paradigm shift presenting a forward thinking perspective on the intersection of technological innovation and sustainable business practices This comprehensive volume bridges the gap between emerging technologies and the imperative for businesses to thrive in a way that benefits society and the environment Through a curated collection of insights strategies and case studies the book offers a valuable resource for understanding how to achieve continuous good performance while making a positive impact in the age of Society 5 0      *Advances in Sensitivity Analysis and Parametric Programming* Tomas Gal,H.J. Greenberg,2012-12-06 The standard view of Operations Research Management Science OR MS dichotomizes the field into deterministic and

probabilistic nondeterministic stochastic subfields This division can be seen by reading the contents page of just about any OR MS textbook The mathematical models that help to define OR MS are usually presented in terms of one subfield or the other This separation comes about somewhat artificially academic courses are conveniently subdivided with respect to prerequisites an initial overview of OR MS can be presented without requiring knowledge of probability and statistics text books are conveniently divided into two related semester courses with deterministic models coming first academics tend to specialize in one subfield or the other and practitioners also tend to be expert in a single subfield But no matter who is involved in an OR MS modeling situation deterministic or probabilistic academic or practitioner it is clear that a proper and correct treatment of any problem situation is accomplished only when the analysis cuts across this dichotomy **Global**
