The Known Economy Colin Danby, 2017-06-26 Why do critics and celebrants of globalization concur that international trade and finance represent an inexorable globe bestriding force with a single logic The Known Economy shows that both camps rest on the same ideas about how the world is scaled Two centuries ago romantic and rationalist theorists concurred that the world was divided into discrete nations moving at different rates toward a modernity split between love and money Though differing over whether this history is tragedy or triumph they united in projecting an empty international space in

which a Moloch like global capitalism could lurk The Known Economy tracks the colonial development of national accounting and re examines the ways gender and heteronormativity are built in to economic representation It re interprets the post WWII spread of standardized economic statistics as the project of international organizations looking over the shoulders of national governments rather than the expanding power of national governments over populations *Unfolding Afterglow* Brooke A. **Understanding the Experience of Disability** Dana S. Dunn, 2019-04-30 Rehabilitation psychologists have long argued that situational constraints e g missing ramps lack of Braille signage nondisabled peoples attitudes create greater social barriers and behavioral restrictions for people with disabilities PWDs than do the disabilities themselves In other words as

social psychologist Kurt Lewin argued situational factors including the perceptions and actions of other people often have greater impact on the experience of disability than do the personal qualities of PWDs themselves. Thus the experience of disability is shaped by a variety of psychosocial forces and factors some of which enhance while others hinder daily living. For adequate understanding and to plan constructive interventions psychological science must attend to how the disabled person and the situation interact with one another.

**Understanding the Experience of Disability: Perspectives from Social and Rehabilitation Psychology** is an edited book containing chapters written by social and rehabilitation psychologists who study how social psychological theory can inform our understanding of the experience of disability and rehabilitation. Chapters are arranged topically into four sections: Established areas of inquiry e.g. stigma, social biases, stereotyping; mainstream topics e.g. women, culture, and race; aging; emerging issues e.g. implicit attitudes, family and parenting issues, positive psychology, and issues of injustice; advocacy and social policy e.g. perceived injustice, disability advocacy, policy implications. Besides informing advanced undergraduate and graduate students and professional researchers/practitioners/audiences, the book will help families and caregivers of PWDs, policy makers, and PWDs themselves understand the social psychological processes linked to disability.

**Arts & Humanities Citation Index**, 2000      Child Psychology Robin Harwood, Scott A. Miller, Ross Vasta, 2008-01-03

This new fifth edition captures the excitement and relevance of child psychology at the beginning of the 21st century, a theme that is exemplified in the text's new subtitle: *Child Development in a Changing Society*. In addition to extensive research coverage, each chapter includes an additional section that relates the chapter subject to social and cultural contexts or implications of research for social policy, public practice, or societal change. This new edition places children, child development, and the contexts in which development occurs at the center of the discourse. Thus, this edition has a strong balance of theory, research, and real-world application.

*Books in Print*, 1994      See the Music, Hear the Dance Baltimore Museum of Art, 2004

This innovative look at African Art presents the wonders of one of America's best-known African collections within the ritual context for which the artworks were first created. Drawing on The Baltimore Museum's renowned African Collection, this vibrantly illustrated exploration of African rituals uniquely encourages readers to look beyond the solitary artifact and toward an understanding of African music and dance as fully sensory experiences. The one hundred objects presented here are parts of ceremonies that rely on sounds, sights, smells, and tastes to deliver their ultimate effects. Color reproductions of the objects, including masks, sculpture, and ceramics, are accompanied by brief essays explaining the contexts within which each was created. The essays focus on costumes, dance, movement, and gesture; music and other sounds; storytelling; audiences; staging and lighting. Field photographs and archival images help bring to life the African ceremonial experience, which we can better understand with the aid of this groundbreaking work.
