Invisible Wounds Of War Coming Home From Iraq And Afghanistan:

Invisible Wounds of War Marguerite Guzman Bouvard, 2012-07-24 There is no real homecoming for many of our veterans returning from the wars in Iraq and Afghanistan. They may go through the motions of daily life in their hometowns but the terrible sights and sounds of war are still fresh in their minds. This empathic inside look into the lives of our combat veterans reveals the lingering impact that the longest wars in our nation's history continue to have on far too many of our finest young people. Basing her account on numerous interviews with veterans and their families, the author examines the factors that have made these recent conflicts especially trying. A major focus of the book is the extreme duress that is a daily part of a soldier's life in combat zones with no clear frontlines or perimeters. Having to cope with unrecognizable enemies in the midst of civilian populations and attacks from hidden weapons like improvised explosive devices exacts a heavy toll. Compounding the problem is the all-volunteer nature of our armed forces which often demands multiple deployments of enlistees. This results in frequent cases of post-traumatic stress disorder and families disrupted by the long absence of one and sometimes both parents. The author also discusses the lack of connectedness between civilian society and military personnel leading to inadequate healthcare for many veterans. This deficiency has been highlighted by the urgent need to treat traumatic brain injuries in survivors of explosions and the high veteran suicide rate. Bouvard concludes on a positive note by discussing some of the surprising and encouraging ways that the chasm between civilian and military life is being bridged to help reintegrate our returning soldiers. For veterans, their families, and especially for civilians unaware of how much our soldiers have endured, *The Invisible Wounds of War* is important reading. *Professional Journal of the United States Army*, 2012

Why Only Art Can Save Us Santiago Zabala, 2017-09-05 The state of emergency according to thinkers such as Carl Schmitt, Walter Benjamin, and Giorgio Agamben is at the heart of any theory of politics. But today the problem is not the crises that we do confront which are often used by governments to legitimize themselves but the ones that political realism stops us from recognizing as emergencies: from widespread surveillance to climate change to the systemic shocks of neoliberalism. We need a way of disrupting the existing order that can energize radical democratic action rather than reinforcing the status quo. In this provocative book, Santiago Zabala declares that in an age where the greatest emergency is the absence of emergency, only contemporary art's capacity to alter reality can save us. *Why Only Art Can Save Us* advances a new aesthetics centered on the nature of the emergency that characterizes the twenty-first century. Zabala draws on Martin Heidegger's distinction between works of art that rescue us from emergency and those that are rescuers into emergency. The former are a means of cultural politics, conservers of the status quo that conceal emergencies; the latter are disruptive events that thrust us into emergencies. Building on Arthur Danto, Jacques Rancière, and Gianni Vattimo, who made aesthetics more responsive to contemporary art, Zabala argues that works of art are not simply a means of elevating consumerism or contemplating beauty but are points of departure to change the world. Radical artists create works that disclose and demand active intervention in

ongoing crises Interpreting works of art that aim to propel us into absent emergencies Zabala shows how art's ability to create new realities is fundamental to the politics of radical democracy in the state of emergency that is the present

Military Review, 2012 *The Social Cognitive Neuroscience of Leading Organizational Change* Robert A. Snyder, 2016-03-10 In a very understandable practical and accessible manner this book applies recent groundbreaking findings from behavioral neuroscience to the most complex and vexing challenges in organizations today In particular it addresses managing large scale organizational changes such as mergers and acquisitions providing lessons and tactics that can be usefully applied to in many different settings In addition to discussing successful practices it also identifies the reasons that most past comprehensive long term change projects have failed and unmasks the counterproductive effects of the typical evolutionary or emotion based attempts to change group and individual behavior using neuroscience as its principal tool Vietnam Reconsidered John Ketwig, 2019-05-06 Very few of the many books about the Vietnam War fully address why the fighting was conducted in such a cruel manner why it was prolonged far past its logical end or what ultimately went wrong American literature has been reluctant to emphasize the fact that between 3.5 and 5 million Southeast Asians died many of them peasants that the majority of the bombs dropped from American planes landed on South Vietnam our ally and an impoverished agricultural society or that the use of napalm and Agent Orange was in reality chemical warfare Americans have been reluctant to acknowledge the damage done but after 17 years of another very similar conflict in Afghanistan many Americans are beginning to wonder why our highly financed and supported military isn't more effective This book strongly suggests that the lessons of Vietnam are relevant and worthy of being reconsidered as today's wars are debated From Captain Kangaroo Roy Rogers and Walt Disney to space travel muscle cars and The Beatles the generation that would be sent to fight in Vietnam was uniquely influenced by times that were a changin Like square pegs in a round hole the post World War II baby boomers were brought up with values that made widespread social outcry against the horrors of the war predictable and necessary Those influences and values have long been ignored but this book revives a spirited discussion and analysis of the first war America lost **Traumatic Brain Injury** Connie Goldsmith, 2014-01-01 Two soccer players collide on the field A soldier in Afghanistan is thrown to the ground during a bomb explosion A teen has an accident while riding her bike and she isn't wearing her helmet Each of these incidents can produce a traumatic brain injury TBI Of the 1.7 million Americans officially diagnosed with TBI each year 52,000 die from their injuries And that doesn't count all the unreported TBIs which experts estimate range from about two to four million more incidents TBIs range from concussions to penetrating head injuries to life threatening brain swelling and coma And they have countless causes war sports car and motorcycle accidents falls and physical violence The aftereffects can be devastating including compromised memory and concentration loss of hearing physical disabilities depression brain disorders and in the worst case scenario death Find out about the different types of TBIs what causes them and how they are diagnosed and treated Along the way you'll learn about

National Hockey League player Derek Boogaard and U S Representative Gabby Giffords both of whom sustained TBIs with dramatically different outcomes You ll also meet teens and young adults living with TBIs and the doctors who treat them And you ll learn about amazing medical technologies that help victims recover and promise hope for the future Going Scapegoat David A. Buchanan,2016-09-27 Since 9 11 war literature has become a key element in American popular culture spurring critical debate about depictions of combat Who can write war literature When can they do it This book presents a new way to closely read war narratives questioning the idea of combat gnosticism the belief that the experience of war is impossible to communicate to those who have not seen it that has dominated the discussion Adapting Kenneth Burke s scapegoat mechanism to the criticism of literature and film the author examines three novels from 2012 Ben Fountain s Billy Lynn s Long Halftime Walk David Abrams s FOBBIT and Kevin Powers The Yellow Birds that represent the U S military responses to 9 11 **Hard Boiled** T.L. disasters war and other hardships also intervene in these stories of multicultural motherhood This book reveals the problems mothers of adult children face and celebrates the outstanding accomplishments of those who mother through hardship
