Invisible Cultures Historical And Archaeological Perspectives:

Invisible Cultures Francesco Carrer, Viola Gheller, 2015 Cultural and social groups whose outlines are difficult to identify are often considered invisible. Occasionally material remains compensate for the absence of historiographical records or literary sources concerning these groups sometimes communities or individuals mentioned in literary sources do not appear to have left material signs of their presence. On the other hand there are groups or individuals whose existence has to be assumed in every historical period even though they are invisible in both historiography and archaeology. Before trying to understand the lifestyle and historical agency of these invisible cultures it is necessary to highlight the reasons why the memory of certain marginalized individuals or socio cultural units disappeared or was obliterated in material culture and in literary sources. The postgraduate conference *Invisible Cultures Historical and Archaeological Perspectives* brought together young scholars from various backgrounds and research interests to discuss these issues. This volume presents the results of this debate through a series of selected papers from various interdisciplinary perspectives which analyse a variety of case studies leading to the identification of new theoretical and methodological perspectives aimed at returning voice and presence to the invisibles of history.

Beyond Borders Ashish Kumar, 2023-10-30 This book examines the economic history of ancient South Asia by situating the Malwa region of Central India within Afro Eurasian trade networks to illuminate the role of traders in the political religious and economic processes connected with the Indo Sasanian trade in the period of five centuries circa CE 300-700. The book challenges the long held centrality of the Roman factor in the South Asian economy by locating the Indo Sasanian interactions in long distance economic networks with trade as a central feature. It considers the role and influence of traders as an understudied group affecting the contribution of the Indian economy to the world system.

Amidst rapidly changing political landscapes traders of Indian and Sasanian origins are studied as conscious political beings who formed ties with varieties of polities and religious communities to secure their commercial interests In addition their commercial interactions with their Sogdian Central Asia and Aksumite East Africa counterparts are analyzed The book also considers the nature of trade routes and the specific connections between mercantile and religious networks including patterns of construction of religious shrines and temples along trade routes Integrating epigraphic numismatic literary and archaeological evidence this book moves away from a marginal treatment of the Indo Sasanian trade in Indian history and demonstrates how regional economic history must address a plurality of causes actors and processes in its assessment of the regional economy The book will be of interest to students and academics of Indian economic history as well as the ancient economies of South Asia more broadly
