#### **Invitation To The Sociology Of International Law:**

Invitation to the Sociology of International Law Moshe Hirsch, 2015 International legal rules are profoundly embedded in diverse social factors and processes International law thus often reflects and affects societal factors nationally and internationally This book exposes some central tenets of the sociological perspective and presents a sociological analysis of significant topics in current international law International Law as a Profession Jean d'Aspremont, Tarcisio Gazzini, André Nollkaemper, Wouter Werner, 2017-04-06 This collection of self reflective essays explores the relations between international legal professions and their respective understandings of international law **International Law and History** Ignacio de la Rasilla, 2021-01-21 This interdisciplinary exploration of the modern historiography of international law invites a diverse assessment of the indissoluble unity of the old and the new in the most global of all legal disciplines The study of the history of international law does not only serve a better understanding of how international law has evolved to become what it is and what it is not Its histories which rethink the past in the present also influence our perception of contemporary matters in international law and our understandings of how they may potentially unfold This multi perspectival enquiry into the dominant modes of international legal history and its fundamental debates may also help students of both international law and history to identify the historical approaches that best suit their international legal historical perspectives and best address their historical and legal research questions International Law as a Belief System Jean d'Aspremont, 2018 Offers a new perspective on international law and international legal argumentation to what event is international law a The Oxford Handbook of International Arbitration Thomas Schultz, Federico Ortino, 2020-09-11 This belief system Handbook brings together many of the key scholars and leading practitioners in international arbitration to present and examine cutting edge knowledge in the field Innovative in its breadth of coverage chapter topics range from the practicalities of how arbitration works to big picture discussions of the actors involved and the values that underpin it The book includes critical analysis of some of international arbitrations most controversial aspects whilst providing a nuanced account overall that allows readers to draw their own informed conclusions The book is divided into six parts after an introduction discussing the formation of knowledge in the field Part I provides an overview of the key legal notions needed to understand how international arbitration technically works such as the relation between arbitration and law the power of arbitral tribunals to make decisions the appointment of arbitrators and the role of public policy Part II focuses on key actors in international arbitration such as arbitrators parties choosing arbitrators and civil society Part III examines the central values at stake in the field including efficiency legal certainty and constitutional ideals Part IV discusses intellectual paradigms structuring the thinking in and about international arbitration such as the idea of autonomous transnational legal orders and conflicts of law Part V presents the empirical evidence we currently have about the operations and effects of both commercial and investment arbitration Finally Part VI provides different disciplinary perspectives on international arbitration including

historical sociological literary economic and psychological accounts International Law's Invisible Frames Andrea Bianchi, Moshe Hirsch, 2021-09-23 What is international law and how does it work This book argues that our answers to these fundamental questions are shaped by a variety of social cognition and knowledge production processes These processes act as invisible frames through which we understand international law To better conceive the frames within which international law moves and performs we must understand how psychological and socio cultural factors affect decision making in an international legal process This includes identifying the groups of people and institutions that shape and alter the prevailing discourse in international law and unearthing the hidden meaning of the various mythologies that populate and influence our normative world With chapters from leading experts in the discipline employing insights from sociology psychology and behavioural science this book investigates the mechanisms that allow us to apprehend and intellectually represent the social practice of international law It unveils the hidden or unnoticed processes by which our understanding of international law is formed and helps readers to unlearn some of the presuppositions that inform our largely unquestioned beliefs about international law International Legal Theory Jeffrey L. Dunoff, Mark A. Pollack, 2022-08-04 A reader friendly overview of leading theoretical approaches to international law for students scholars and practitioners Cosmopolitanism and the Development of the International Criminal Court Jennifer Biedendorf, 2019-08-01 Cosmopolitanism and the Development of the International Criminal Court analyzes a set of prominent and competing discourses that emerged in the context of the development and establishment of the International Criminal Court ICC The ICC is the first permanent juridical body designed to prosecute individuals who commit offences including war crimes crimes against humanity and genocide Drawing on scholarship on public memory and human rights the book argues that international law and the international human rights system play a key role for the development of transnational memory discourses and transnational or cosmopolitan subjectivities Despite the International Criminal Court being recognized as a landmark development in global cooperation an examination of key events in the development of the court shows how some state and nonstate actors advance calls for cosmopolitanism while others resist cosmopolitanism to bolster nation state sovereignty Drawing on the establishment of the International Criminal Court as a case study the book examines several events that continue to shape national and international public discourse The book examines debates that occurred during the drafting process of the international treaty at the United Nations and that led to the groundbreaking inclusion of provisions on gender and sexual violence in the Rome Statute of the ICC in 1998 The analysis discusses the tension between feminist advocates rhetoric and the discourse of anti women s rights actors involved in the treaty making process who resisted such inclusions in international criminal law The book analyzes other key events related to the establishment of the ICC that invoke tensions between competing demands of cosmopolitanism and national sovereignty including advocacy campaigns by nongovernmental organizations working to drum up public support of the institution of the International Criminal Court and the debates surrounding the unprecedented

act of the United States unsigning an international treaty In sum this examination of the rhetoric of state and nonstate actors attempting to shape the court according to their visions of global community shows how discourses about international criminal law and human rights are employed not only to advance cosmopolitanism but also to strengthen nationalist Hague Yearbook of International Law / Annuaire de La Haye de droit international, Vol. 35 (2022) Jure Vidmar, 2024-03-18 The aim of the Hague Yearbook of International Law is to offer a platform for review of new developments in the field of international law In addition it devotes attention to developments in the international law institutions based in the international City of Peace and Justice The Hague This Special Issue of Yearbook stems from a conference organised by the Maastricht University Study Group for Critical Approaches to International Law in April 2022 The conference entitled Deconstructing International Law invited participants to reflect on and dismantle some of the foundational ideas of international law The Art of Law in the International Community Mary Ellen O'Connell, 2019-05-16 Aesthetic philosophy and the arts offer an innovative and attractive approach to enhancing international law in support of peace Histories Written by International Criminal Courts and Tribunals Aldo Zammit Borda, 2020-12-18 This book argues for a more moderate approach to history writing in international criminal adjudication by articulating the elements of a responsible history normative framework The question of whether international criminal courts and tribunals ICTs ought to write historical narratives has gained renewed relevance in the context of the recent turn to history in international criminal law the growing attention to the historical legacies of the ad hoc Tribunals and the minimal attention paid to historical context in the first judgment of the International Criminal Court The starting point for this discussion is that in cases of mass atrocities prosecutors and judges are inevitably understood to be engaged in writing history and influencing collective memory whether or not they so intend Therefore while writing history is an inescapable feature of ICTs there is still today a significant lack of consensus over the proper place of this function Since Hannah Arendt articulated her doctrine of strict legality in response to the prosecutor's expansive didactic approach in Eichmann the legal debate on the subject has been largely polarised between restrictive and expansive approaches to history writing in mass atrocity trials What has been noticeably missing from this debate is the middle ground The contribution this book seeks to make is precisely to articulate a framework that occupies that ground The book asks what are the lenses through which judges of ICTs interpret historical events what kind of histories do ICTs write and what kinds of histories should ICTs produce Its arguments for a more moderate approach to history writing are based on three distinct but interrelated grounds 1 Truth and Justice 2 Right to Truth and 3 Legal Epistemology Different target audiences may benefit from this book Court officials and legal practitioners may find the normative framework developed herein useful in addressing the tensions between the competing objectives of ICTs and in particular in assessing the value of the history writing function Lawyers historians and other academics may also find the analysis of the strengths constraints and blind spots of the historical

narratives written by ICTs interesting This issue is particularly timely in view of current debates on the legacies of ICTs Aldo Zammit Borda is Director of the Centre for Access to Justice and Inclusion at Anglia Ruskin University Cambridge UK

Contract Interpretation in Investment Treaty Arbitration Yuliya Chernykh, 2022-01-17 Contracts are relevant frequently central for a significant number of investment disputes Yet the way tribunals ascertain their content remains largely underexplored How do tribunals interpret contracts in investment treaty arbitration How should they interpret contracts Does national law have any role to play Contract Interpretation in Investment Treaty Arbitration A Theory of the Incidental Issue addresses these questions The monograph offers a valuable insight into the practice and theory of contract interpretation in investment treaty arbitration By proposing a theoretical frame for seamless integration of contract interpretation into the overall structure of decision making the book contributes to predictability coherence sufficiency and correctness of the tribunals interpretative practices in investment treaty arbitration The Justification of War and International Order Lothar Brock, Hendrik Simon, 2021-02-11 The history of war is also a history of its justification The contributions to this book argue that the justification of war rarely happens as empty propaganda While it is directed at mobilizing support and reducing resistance it is not purely instrumental Rather the justification of force is part of an incessant struggle over what is to count as justifiable behaviour in a given historical constellation of power interests and norms This way the justification of specific wars interacts with international order as a normative frame of reference for dealing with conflict The justification of war shapes this order and is being shaped by it As the justification of specific wars entails a critique of war in general the use of force in international relations has always been accompanied by political and scholarly discourses on its appropriateness In much of the pertinent literature the dominating focus is on theoretical or conceptual debates as a mirror of how international normative orders evolve In contrast the focus of the present volume is on theory and political practice as sources for the re and de construction of the way in which the justification of war and international order interact With contributions from international law history and international relations and from Western and non Western perspectives this book offers a unique collection of papers exploring the continuities and changes in war discourses as they respond to and shape normative orders from early modern times to the present A Human Rights Based Approach to Development in India Moshe Hirsch, Ashok Kotwal, Bharat Ramaswami, 2019-08-15 Over the last twenty years India has enacted legislation to turn crucial goals such as food security primary education and employment into legal rights for its citizens But enacting laws is one thing and implementing them through an imperfect institutional structure is another A Human Rights Based Approach to Development in India examines a diverse range of human development issues over a period of rapid economic growth in India Demonstrating why institutional and economic development are synonymous the essays in this volume detail the many obstacles that may hinder development In addition they show how the domestic policies required to implement laws may undermine India s treaty obligations at the World Trade Organization or under the

Agreement on Trade Related Aspects of Intellectual Property Rights The contributors ultimately ask whether development can be achieved by making it a legal right and whether India's right to develop is truly at odds with its international commitments Wither the West? Chiara Giorgetti, Guglielmo Verdirame, 2021-04-29 A collection of expert essays analyzing how American and European's views of international law are diverging as a reaction to globalization The Human Rights Covenants at 50 Daniel Moeckli, Helen Keller, Corina Heri, 2018 Fifty years after the UN General Assembly adopted the two human rights covenants this volume brings together contributions considering the key issues facing the international human rights system today taking stock of the achievements of the covenants assessing their current influence and exploring the future challenges facing them Intersections of Law and Memory Miroslaw Michał Sadowski, 2024-03-12 This book elaborates a new framework for considering and understanding the relationship between law and memory How can law influence collective memory What are the mechanisms law employs to influence social perceptions of the past And how successful is law in its attempts to rewrite narratives about the past As the field of memory studies has grown this book takes a step back from established transitional justice narratives returning to the core sociological philosophical and legal theoretical issues that underpin this field The book then goes on to propose a new approach to the relationship between law and collective memory based on a conception of legal institutions of memory It then elaborates the functioning of such institutions through a range of examples taken from Japan Iraq Brazil Portugal Rwanda and Poland that move from the work of international tribunals and truth commissions to more explicit memory legislation The book concludes with a general assessment of the contemporary intersections of law and memory and their legal institutionalisation This book will be of interest to scholars with relevant interests in the sociology of law legal theory and international law as well as in sociology and politics The Evolving International Procedural Capacity of Individuals Katrin Fenrich, 2019-06-19 This book critically addresses the still prevalent assumption of the individual s procedural disability in international judicial fora Against this backdrop it examines and compares various international enforcement mechanisms from the individual s perspective Establishing specific comparison criteria the book identifies the benefits and weaknesses of these mechanisms and traces the ongoing process of individualization in the field of international procedural law Thus it not only maps the complex landscape of international enforcement mechanisms it also integrates the theoretical question of the individual s role in international law with the practical issue of enforcing individual rights thereby connecting the fields of legal theory and international procedural law Academic readers interested in the intersection of international legal theory and international procedural law will find the book both enjoyable and insightful Further researchers and students of public international law will benefit from its in depth analysis and comparative focus Formalism and the Sources of International Law Jean d'Aspremont, 2013-05-23 This book revisits the theory of the sources of international law from the perspective of formalism It critically analyses the virtues of formalism construed as a theory of law ascertainment as a means of distinguishing between

law and non law The theory of formalism is re evaluated against the backdrop of the growing acceptance by international legal theorists of the blurring of the lines between law and non law At the same time the book acknowledges that much international normative activity nowadays takes place outside the ambit of traditional international law and that only a limited part of the exercise of public authority at the international level results in the creation of international legal rules The theory of ascertainment that the book puts forward attempts to dispel some of the illusions of formalism that accompany the traditional sources of international law It also sheds light on the tendency of scholars theorists and advocates to deformalize the identification of international legal rules with a view to expanding international law The book seeks to revitalize and refresh the formal identification of rules by engaging with some tenets of the postmodern critique of formalism As a result the book not only grapples with the practice of law making at the international level but it also offers broad theoretical insights on international law dealing with the main schools of thought in legal theory positivism naturalism legal realism policy oriented jurisprudence and postmodernism This paperback edition features the author's discussion of this book on the EJIL Talk blog

Judging at the Interface Esmé Shirlow, 2021-02-18 This book investigates how international adjudicators defer to State decision making authority and what that reveals about the domestic international interface
