Restoring the Innovative Edge Jerry Hage, 2011-05-17 Considerable evidence indicates that the U.S. is falling behind when it comes to innovation In part this shift stems from the globalization of research and the advancement of other nations But it also arises from a widespread failure to adapt to the competitive environment generated by the evolution of science and technology The objective of this book is to provide possible remedies for eight key obstacles that the U.S. faces in restoring its innovative edge Understanding that these

remedies are complex each chapter also discusses the dilemmas and impediments that make change a challenge Unlike other books that suggest simple fixes to the U S innovation crisis this book argues that the management of innovation requires multiple interventions at four different levels in research teams organizations economic and non economic sectors and society at large Restoring the Innovative Edge offers specific recommendations for new forms of data collection fresh ideas about cooperation between the public and the private sectors in manufacturing research and a policy evaluation model that measures technical progress and obstacles to it in real time Moreover the book s multi level perspective allows for the integration of a number of specialties within Sociology and Management around the theme of a new socio economic paradigm built on ideas of evolution and failed evolution
