Smith, 2017-11-20 Ever increasing interest in oceanography and marine biology and their relevance to global environmental issues create a demand for authoritative reviews summarizing the results of recent research Oceanography and Marine Biology An Annual Review has catered to this demand since its founding by the late Harold Barnes more than 50 years ago Its objectives are to consider annually the basic areas of marine research returning to them when appropriate in future volumes to deal with subjects of special and topical importance and to add new subjects as they arise The favourable reception and complimentary reviews accorded to all the volumes shows that the series is fulfilling a very real need Volume 55 follows closely the objectives and style of the earlier volumes continuing to regard the marine sciences with all their various aspects as a unity Physical chemical and biological aspects of marine science are dealt with by experts actively engaged in these fields and every chapter is peer reviewed by other experts working actively in the specific areas of interest Chapters 3 4 5 and 6 of this book are freely available as downloadable Open Access PDFs at <http://www.taylorfrancis.com> under a Creative Commons Attribution Non Commercial No Derivatives CC BY NC ND 4 0 license

Wildlife Review ,1995 *Lipid Metabolism and human diseases* Da-wei Zhang, Xian-Cheng Jiang, Kai Yin, 2023-09-28 Lipids such as cholesterol phospholipids triglycerides and free fatty acids play various essential physiological roles Dysregulation of lipid metabolism causes dyslipidemia which is a critical factor in the development of various human diseases such as cardiovascular disease diabetes non alcoholic fatty liver disease Alzheimer s disease and Niemann Pick disease Therefore lipid homeostasis in humans is strictly regulated by a well balanced mechanism of intestinal uptake endogenous synthesis and metabolism and transport in lipoprotein particles and excretion The human body evolves multiple mechanisms to maintain lipid homeostasis such as low density lipoprotein receptor mediates clearance of circulating low density lipoprotein cholesterol phospholipid transfer protein mediates the transfer of phospholipids from apoB containing triglyceride rich lipoprotein to high density lipoprotein etc The Biology and Identification of the Coccidia (Apicomplexa) of Carnivores of the World Donald W. Duszynski, Jana Kvičerová, R. Scott Seville, 2018-06-29 The fundamental concept of The Biology and Identification of the Coccidia Apicomplexa of Carnivores of the World is to provide an up to date reference guide to the identification taxonomy and known biology of apicomplexan intestinal and tissue parasites of carnivores including but not limited to geographic distribution prevalence sporulation prepatent and patent periods site s of infection in the definitive and if known intermediate hosts endogenous development cross transmission pathology phylogeny and if known their treatments These data will allow easy parasite recognition with a summation of virtually everything now known about the biology of each parasite species covered The last very modest and only treatise published on this subject was in 1981 so this

book fills a fundamental gap in our knowledge of what is now known and what is not about the coccidian parasites that infect and sometimes kill carnivores and or their prey that can harbor intermediate stages including many domestic and game animals Offers line drawings and photomicrographs of many parasite species that will allow easy diagnosis and identification by both laypersons and professionals veterinarians wildlife biologists etc Presents a complete historical rendition of all known publications on carnivore coccidia for all carnivore families and evaluates the scientific and scholarly merit of each apicomplexan species relative to the current body of knowledge Provides a complete species analysis and their known biology of all coccidia described from each carnivore lineage and species Reviews the most current taxonomy of carnivores and their phylogenetic relationships to help assess host specificity patterns that may be apparent Evaluates what little cross transmission work is available to help understand the complexities of those coccidians that use two hosts e g Sarcocystis Besnoitia and others Provides known treatments for the various parasite genera species
